

# Advancement & Transition Services invites you to celebrate a new partnership with the United States Geological Survey!

During the 2018 Spring Semester, ATS students have been participating in an internship with the USGS digitizing scientific records for the National Wildlife Health Center in Madison, WI. This partnership provides students with disabilities a unique opportunity to participate in scientific research. Our students' contributions are making a significant impact in the field of science along with learning important skills that can be transferred to other employment settings.

## *Join our celebration!*

**April 13, 2018**

**TUC 427**

**1:15 PM – 2:30 PM**

**Presentation followed by light refreshments.**

## **Please RSVP at**
