Installing UC’s VPN client, *Network Connect*, on the Mac OS X.

**Requirements**
- Internet Access
- Administrator rights to the machine
- UC username and password (Blackboard, Email, Onestop, etc.)

Locate the Safari browser in your dock. Click this application to launch it.
Once Safari has opened, type **SSLVPN.UC.EDU** into the navigation bar and click enter.
You should appear at a webpage like the one below. Type in your UC username and password and click Sign In.
Once you have logged in, you will be at the webpage below. Locate the Start button, and click it.
You may get a pop-up like this one. Click Enable and then restart your web browser. Follow the steps previously to get back to this step. If you don’t see this message, move on to the next step.
A window like the one in the picture below will appear. Check the box that says to *Allow all applets from "sslvpn.uc.edu"* and then click Allow.

If an error prevents the Network Connect from loading properly, you can:

- Check browser compatibility.
- Contact. Not all functionality may be available.
Another window like the one below will appear. Click Always.

Please wait...
Launching Network Connect. This may take from a few seconds to a couple of minutes, depending on your bandwidth.

Examining the current installation...
Network Connect is now going to install onto your computer. In order to allow the installation, type the administrative password to your Mac, and then click OK.
Once it has installed, you will be back at this page. Notice the new Network Connect icon in your dock.
Once you close Safari, you will see a window like the one in the picture below. This shows the details of your VPN connection. You have successfully installed UC’s VPN client. The next steps guide you through opening the VPN client once you have installed it.

**Please Note:**

![VPN Connection Window](image)

- **sslvpn.uc.edu**
  - Duration: 26 seconds
  - Assigned IP: 10.24.145.210
  - Hide Details
  - Sent/Received: 2.9 KB / 2.7 KB
  - Security: SSL
  - Compression: Deflate
  - Transport Mode: SSL over Wi-Fi
Once you have installed the Network Connect application, it will appear in the Application part of the Finder. Locate app, and click to launch it.
A window like the one in the picture below will appear. In the Sign in at toolbar, type: **SSLVPN.UC.EDU** and click enter.
The window should change. Use your UC username and password to Sign In.
Once you have logged in, you should be able to see the Network Connect details window. You have now successfully created a VPN connection to UC’s network.
