IT Certificate Program of Study – Database Management

Welcome to the Information Technology program! This certificate is intended to provide an in-depth understanding of database technologies, and covers the full spectrum of topics in order to prepare students and practitioners to be knowledgeable in database concepts, terminology, design methods and techniques. Based on your interest in the Database Management track, the following sequence of courses must be completed to fulfill the requirements of the program. These courses may be substituted, but only at the approval of the IT academic advisor.

Course Number	
IT 1050	Fundamentals of IT
IT 1090C	Computer Programming I
IT 2045C	Computer Programming II
IT 2030C	Information Security and Assurance
IT 2060C	Database Management I
IT 3060C	Database Management II

It is your responsibility to schedule an appointment with the IT academic advisor each term to ensure you are making progress toward the certificate. To schedule an appointment, contact the CECH Student Service Center at (513) 556-2336.
