LSCMI: LEVEL OF SERVICE / CASE MANAGEMENT INVENTORY

The Level of Service/Case Management Inventory (LS/CMI) is an assessment that measures the risk and need factors of late adolescent and adult offenders. The LS/CMI is also a fully functioning case management tool. This single application provides all the essential tools needed to aid professionals in the treatment planning and management of offenders in justice, forensic, correctional, prevention and related agencies. Developed to reflect the increasing knowledge base on offender risk assessment since the Level of Service Inventory-Revised (LSI-R™), LS/CMI has refined and combined the 54 LSI-R items into 43 items in Section 1. In addition 10 comprehensive sections have been incorporated to further assist public safety professionals in their analysis of offender management.

To use the program, staff must first participate in a structured training. After that staff can immediately implement the use of the LS/CMI with clients. Because UCCI does not hold the copyright for this program, use of the LS/CMI requires the ongoing purchase of user forms from MHS Assessments.

OVERVIEW

Components of the assessment include:

- General Risk/Need Factors
- Specific Risk/Need Factors
- Prison Experience – Institutional Factors
- Other Client Issues (Social, Health, and Mental Health)
- Specific Responsivity Considerations
- Risk/Need Summary and Override
- Risk/Need Profile
- Program/Placement Decision
- Case Management Plan
- Progress Record
- Discharge Summary

END USER

The end user session is three days of onsite training for a maximum of 30 trainees.
