

Bachelor of Science

Early Childhood Education

The Early Childhood Education Online program, prepares you to care for children ages birth to five years from a variety of cultural and ethnic backgrounds. Learn to design and implement developmentally appropriate learning environments for infants, toddlers, and preschoolers.

You'll thrive in our online learning environment designed to be highly supportive and convenient for working professionals.

***The online bachelor degree does not lead to an Ohio PreK - Grade 5 teaching licensure.**

Be EXPERIENCED

Our program includes at least one student teaching experience that requires access to children. For that reason, this degree option is highly desirable for working practitioners who can complete most field work as a part of their job duties. The preschool and infant/toddler student teaching practicum and internships may be completed in the teachers own classroom, subject to the approval by program faculty.

Be INVESTED

The demand for early childhood care and education programs continues to increase, not only in response to the growing demand for out-of-home child care, but also in recognition of the critical importance of educational experiences during the early years. You'll have the opportunity to work in a variety of settings, including military child care centers, Early Head Start or Head Start, preschool, and family child care centers.

**Accessible
to you
