WELCOME LETTER TO STUDENTS

Dear Entering Students:

Welcome to the School Psychology Program at the University of Cincinnati- a program that we believe, and external reviewers have rated, is among the very best in the nation. Your admission to the Program is indicative of your record of past academic success, your interest in school psychology as a profession and in our Program philosophy in particular, your interest in research and leadership through doctoral study, and our belief and expectation that you will continue to distinguish yourself in the future through your academic and professional commitment. We look forward to working closely with you over the next five years as you grow professionally and personally.

We have designed a training program of the highest quality to prepare you to be a highly competent and successful school psychologist with the training needed to positively impact children and families and the schools and other agencies that serve them. The Program has been designed to meet national accreditation standards as well as the course work and internship requirements for licensure and national certification. Doctoral Program graduates have distinguished themselves in many ways, including serving in faculty and leadership positions in school psychology, receiving state and national recognition for innovative practices, and demonstrating positive impact on children in their work. The faculty, alumni, and students take great pride in our training Program and hold ourselves and our students to high standards. The program will be challenging yet rewarding.

Students are expected to be familiar with contents of the Program Handbook, the University *Graduate Handbook*, and all University policies, including the Student Code of Conduct and research ethics. Links to university requirements are listed in this Handbook, which is available on the Program website.

Sincerely,

The School Psychology Program Faculty

PREFACE

The *School Psychology Doctoral Program Handbook* is intended to provide students with specific information about the University of Cincinnati; the College of Education, Criminal Justice, and Human Services (CECH); the School of Human Services; and the School Psychology Program. This Handbook is a tool for students as they progress through the Doctoral Program. Program policies exist within the framework of those of the College and the University (The Graduate School). The *Program Handbook* presents policies and procedures specific to the Doctoral (PhD) Program in school psychology and is in compliance with the rules and policies of the Graduate School and the College of Education, Criminal Justice, and Human Services. Students are responsible for being aware of Program, College, and University regulations and policies described in the *Program Handbook*, College policies (available at <http://cech.uc.edu/>), the *University of Cincinnati Graduate Handbook* (available on-line at grad.uc.edu), and the *Student Code of Conduct* (available on-line at http://www.uc.edu/conduct/Code_of_Conduct.html).

Graduate programs at the University of Cincinnati are organized within Graduate Studies (The Graduate School). The Dean of the Graduate School is responsible for coordinating, implementing, and administering all policies, rules, and regulations pertaining to graduate degree programs, including those of the School of Human Services. It is the role of the Graduate Faculty to determine educational policy of The Graduate School and to regulate admission of students, advancement to candidacy, and awarding of graduate degrees. The Graduate Faculty has sole power in establishing requirements, but leaves to each individual department and program the right to determine specific courses of study, precise manners of instruction, and individual methods for evaluating the results of examination.

INTRODUCTION TO DOCTORAL STUDY IN SCHOOL PSYCHOLOGY AT THE UNIVERSITY OF CINCINNATI

The Doctoral School Psychology Program at the University of Cincinnati is dedicated to preparing highly competent professional school psychologists according to the scientist-practitioner model. As a result of their broad-based training, doctoral graduates are prepared to make significant contributions to this challenging field through the most up-to-date professional practice, research, professional leadership, supervision, and teaching.

The Program has attained a high level of national recognition and visibility as a result of its leadership in developing training methods and its state-of-the-art curriculum. The Doctoral Program is accredited by the American Psychological Association (APA) and is fully approved by the National Association of School Psychologists (NASP). The educator preparation provider (University of Cincinnati College of Education, Criminal Justice, and Human Services) is accredited by the Council for the Accreditation of Educator Preparation (CAEP). The curriculum includes a course sequence verified by the Behavior Analyst Certification Board (BACB) under the Fifth Edition Task List.

External reviews have resulted in consistently positive evaluations of UC's doctoral training, including the curriculum model, faculty, student skill attainment, field experiences, and outcome evaluation. Reviewers have been impressed with the quality of training provided to students and the support they receive from our strong faculty and excellent network of field supervisors. Most recently, the Program was rated as Outstanding by external reviewers in the 2017-2018 Graduate Program Review. The School Psychology Program has attained national prominence for academic excellence. It is a reputation in which the faculty, students, alumni, and staff take great pride, and one which we are determined to maintain.

Statement of Program Philosophy

The Doctoral School Psychology Program at the University of Cincinnati is founded on the core ethical principles that psychologists respect the dignity and worth of all individuals and aim to promote measurable positive outcomes in their work. These principles are articulated in the ethical, professional practice, and training standards of the National Association of School Psychologists, the Association for Behavior Analysis International, and the American Psychological Association. The University of Cincinnati School Psychology Program, in applying these core principles, places an emphasis on the use of scientist-practitioner and ecological-behavioral models to guide research and practice. As scientist practitioners, students are trained to critically examine theory and practice, develop a defensible professional model of practice, collect and use accountability data for decisions, and engage in research to improve professional knowledge and practice. In applying an ecological-behavioral approach, students learn to focus on changing behaviors in important contexts, such as the school and family, to collaborate with key individuals for effecting meaningful changes in these contexts, and to provide leadership at a systems level for change.

These core principles serve as the foundation for the Doctoral Program philosophy and approach, and are translated into several interrelated training themes that together form the basis for the Program training model and activities. These Program training themes are:

- Child and family advocacy
 - Competence enhancement perspective – accountability for improved skills and outcomes
 - Promotion of positive outcomes for all students (systems-level) and each student (individual-level)
- Scientist-practitioner model
 - Development of and adherence to a defensible personal model of practice aligned with the Program model
 - Legal-ethical foundations for practice
 - Data-based practice and accountability
 - Contribution to research and use of research for practice
 - Contribution to practice and the profession
- Ecological/behavioral orientation, integrating key theoretical approaches and psychological foundations
 - Ecological-behavioral, social cognitive, and systems theories
 - Advanced behavioral theory, practice, and research
 - Meaningful approach to diversity and individual differences
- Problem-solving approach for prevention and intervention
 - Data-based decision making - linking assessment, intervention, evaluation
 - Data-based problem solving as core of practices across all tiers of services delivery
 - Universal/core system-level instruction and support (district, school, class-wide) – Tier 1
 - Targeted/supplemental (small group) interventions – Tier 2
 - Intensive/individualized interventions – Tier 3
- Collaboration/collaborative approaches across all activities
- Leadership/initiative role
 - Responsibility for developing, refining, adhering to, and examining model of practice
 - Responsibility for continued professional development (self and others)
 - Leadership through research, teaching, supervision, and change facilitation
 - Advocacy for effective services

The Program provides future doctoral-level school psychologists with a solid professional and academic foundation reflecting depth and diversity in both psychology and education. The

Program fosters a special sensitivity to the social foundations and cultural diversity of all people and respect for the uniqueness and human dignity of each person. Self-awareness, regard for others, and respect for cultural and individual differences are actively cultivated and expected of all students.

The major emphasis of the Doctoral Program is the preparation of school psychologists within a scientist-practitioner framework. Thus, rather than being trained to respond to specific problems in specific ways, students are prepared as highly competent problem solvers who draw on strong foundations in psychology and education to collaborate with other professionals and parents to promote the educational and social/emotional competence of all children. A scientist-practitioner, data-based problem-solving approach is used to develop, implement and evaluate the effectiveness of strategies for preventing or resolving problems. This scientist-practitioner approach pervades all aspects of professional practice and decision making, including using research and technically sound data base to guide practice and evaluate outcomes of professional practices and activities. Contributing to research that informs professional practice is a central focus of the Doctoral Program.

The Program emphasizes the importance of delivering school psychological services from a consultative, collaborative problem-solving framework to prevent and remediate learning and adjustment problems experienced by children and adolescents. Students learn to view problems from a systems/ecological and behavioral perspective focusing on the child, the family, school, and community. Doctoral students receive in-depth training in behavioral theory, practice, and research. A leadership child advocacy perspective provides a framework, along with a scientist-practitioner perspective, for guiding decisions and practices that provide supportive educational environments and enhance positive outcomes for all children. Doctoral students develop knowledge and skills in leadership and change facilitation toward advocating for effective practices. They also develop skills and receive supervised experience in teaching and supervision. Both the theoretical and the empirical bases of professional practice are emphasized, and a diverse range of practical experiences are provided throughout all preparation. These include work with preschool through high school-aged students in urban, suburban, and rural school and clinical settings, and working with supervisors who can support and model a scientist-practitioner approach to practice.

Program graduates are prepared for various leadership positions in school psychology. Graduates are employed in a variety of settings including school districts (often in supervisory positions or responsible for innovative programs), related agencies (e.g., preschool settings, child and family services, regional training centers, state agencies), clinical settings (e.g., private practice, hospitals), and universities as school psychology faculty members. Many graduates have had leadership positions in professional associations. Graduates are license-eligible for independent practice with state boards of psychology, following relevant state requirements for doctoral-level internships and required post-doctoral supervised experience. Doctoral graduates also complete all requirements for specialist-level certification as school psychologists, consistent with national certification standards of NASP.

School Psychology Program Approval and Accreditation

The Doctoral Program is accredited by the American Psychological Association (APA). The Program is also approved by the National Association of School Psychologists (NASP) and the educator preparation provider (UC College of Education, Criminal Justice, and Human Services) is accredited by the Council for the Accreditation of Educator Preparation (CAEP). In addition, the Program is approved for Educator Preparation by the Ohio Department of Education. The Program curriculum includes a course sequence verified by the Behavior Analyst Certification Board (BACB) under the Fifth Edition Task List.

Student Composition

Each year approximately 3-5 PhD students are admitted to the Doctoral Program. Currently, there are 17 students enrolled, including two male students (12%) and four students of color (24%). A broad range of geographic areas and undergraduate institutions are represented. Many first-year students have recently completed their undergraduate training, although many have relevant work experience.

A special effort is made to recruit a diverse student body. As a reflection of the University of Cincinnati's commitment to ethnic minority students, the National Advisory Council on Black Higher Education recently identified the University as one of only 3 predominately white comprehensive research institutions to rise above the national average in retaining and graduating Black graduate and professional students. The School Psychology Program and the University are deeply committed to providing the guidance and support necessary for the successful completion of every student's program of study.

The University and Community

The University consists of 14 Colleges and Schools, including over 350 graduate degree programs and certificates. Over the years, the University has achieved an outstanding national and international reputation in many areas. The Carnegie Commission has designated it a Research University with Very High Research Activity. The National Science Foundation ranks the University's sponsored research as 47th in the nation (top 2%) among all universities and 27th among public universities. U.S. News and World Report ranks the University "Among the top tier of the Best National Universities" and 15th among "Up-and-Coming" national universities. The Chronicle of Higher Education called UC a "research heavyweight."

Over 44,000 students (approximately 12,000 graduate and professional) attend the University of Cincinnati. The campus includes excellent facilities for a variety of recreational activities including a new Student Center for swimming, basketball, running, tennis, racquetball, weight training and other activities. There is wide access to computer labs and wireless networks. The University has undergone extensive renovation to modernize and enhance student facilities.

Forbes magazine names UC one of the world's most beautiful campuses. Also, Princeton Review named the University of Cincinnati a "green university." It also sponsors movies, concerts, theater, athletic, and musical events. The School Psychology Program holds various social gatherings for Program students.

There is much in the city of Cincinnati that will add a broader dimension to students' academic careers. Cincinnati has been rated as being one of the most attractive and livable cities in the United States. It is noted for its cultural heritage, with its nationally known symphony orchestra, ballet, museums, zoo, and public theater. There are numerous other activities to enjoy including the Cincinnati Reds baseball team, the Cincinnati Bengals football team, many beautiful parks and rivers, and a nearby ski area. Within the region are many opportunities for outdoor recreation, including camping, hiking, rock climbing, and boating/canoeing. The cost of living is moderate, as is the climate. Greater Cincinnati captures the unique characteristics of 3 states (Ohio, Kentucky, and Indiana) within a single metropolitan area. Its hills and valleys surround the Ohio River, providing a setting for one of America's most beautiful inland cities.

The Cincinnati metropolitan area of 2 million people has 8 colleges and universities in addition to the University of Cincinnati. The city is located conveniently along major interstates as well as airline, train, and bus routes. It is within a 2 hour drive of Columbus, Indianapolis, Louisville, and Lexington, and within 5 to 6 hours of Pittsburgh, Cleveland, St. Louis, Knoxville, Detroit, and Chicago.

Support Systems

Doctoral study is extremely challenging and demanding, both academically and personally. The school psychology faculty expect each doctoral student to demonstrate maturity, initiative, and independence, and we also strive to support and assist students in their endeavors as much as possible. An emphasis on close student-faculty relationships is maintained by carefully limiting the number of students enrolled in the program and through a minimum of semester meetings between Faculty Advisor/Chair and students. Doctoral students meet approximately monthly with Program Faculty in the Doctoral Colloquium, fostering research participation and skills. Informal lunch meetings with cohorts of students and faculty also occur regularly. Incoming students are assigned student mentors to assist with first-year transition, and cross-year mentoring opportunities occur during every year of the Program. Students also are actively encouraged to collaborate as a class and develop support networks for study and dissertation research. Doctoral students are members of research teams and participate in vertical teams of doctoral students across years of study.

Various support systems exist within the University itself to assist students. Among these are the following:

Career Development and Placement Center: assists students in obtaining part-time

employment; assistance is also available for the spouses of students (www.uc.edu/career)

Computer Facilities and E-Mail: students have wide access to computers, printers, and technical assistance in computer labs in Teachers College and throughout the campus, as well as wireless access. All students must sign up for a UC email account which provides access to internet, e-mail, and various campus resources. **This University-assigned e-mail is the official means for university and Program communications, so students are responsible for checking their e-mail regularly. E-mail from the program and faculty can only be sent to the student's UC e-mail account.**

Counseling: a comprehensive variety of confidential counseling services are available (<http://www.uc.edu/counseling.html>; 513.556.0648)

Accessibility Resources: provides supports and services for students with different abilities (<http://www.uc.edu/aess.html> 513.556.6823)

Ethnic Programs and Services: provides specific supports and services for ethnic minority students (www.uc.edu/eps/ 513.556.6008)

Financial Aid: see Financial Aid section and <http://financialaid.uc.edu/> for more information

Health Services: provides various wellness and health services (www.uc.edu/uhs.html)

Housing: special graduate student housing is available in the residence halls and in campus apartment complexes; married student housing is also available (www.uc.edu/housing) Current students can be very helpful in securing off-campus housing.

Institutional Review Board Help Desk: provides consultation on preparation of proposals for IRB review (www.researchcompliance.uc.edu/irb)

Parking Services: students may sign up for a permit for various student parking lots. Space is limited, but other options are available (www.uc.edu/parking/ 513.556.2283)

Technology Resources: assistance with various aspects of technology are available through UC Information Technology (UCIT) (www.ucit.uc.edu, Help Desk 513.556.HELP)

Faculty

The School Psychology Program is housed administratively in the School of Human Services, one of three Schools in the College of Education, Criminal Justice, and Human Services (CECH). The other academic programs in the School are Behavior Analysis, Counseling, Substance Abuse Counseling, Health Promotion and Education, and Sport Administration.

Five full-time faculty members are responsible for the School Psychology Program. Each is a school psychologist with a doctoral degree in school psychology and experience as a school psychologist. Faculty are actively involved in professional practice, consultation, training, and research in schools and educational organizations. Faculty are very involved in supporting reform efforts in Ohio schools/preschools and have received numerous state and federal grants consistent with these efforts.

External reviews have repeatedly noted faculty as a Program strength. The members of the school psychology faculty have distinguished themselves and attained national prominence and respect through their professional accomplishments. They are active researchers and have published widely on diverse topics relevant to school psychology. Faculty have been appointed to positions on editorial and director boards of such widely disseminated publications as *School Psychology Review*, *School Psychology Quarterly*, *Journal of School Psychology*, *Psychology in the Schools*, *Journal of Educational and Psychological Consultation*, and the *Journal of Behavioral Education*. They also frequently serve as ad hoc reviewers for other journals.

The faculty also are active members and leaders of national and state professional organizations. Faculty have served and/or are serving in leadership positions in the National Association of School Psychologists (NASP), the American Psychological Association (APA, Division 16), the Ohio School Psychologists Association (OSPA), the Council of Directors of School Psychology Programs (CDSPP), and the Ohio Inter-University Council for School Psychology (IUC). Faculty also have served on state and national policy committees (Ohio Department of Education, United States Department of Education, and National Association of State Directors of Special Education). Faculty hold many honors, including Lightner-Witmer award with APA and membership in the Society for the Study of School Psychology. In addition, they have conducted workshops and given presentations for numerous professional groups throughout the United States.

Primary Faculty

Tai A. Collins (Associate Professor, PhD, 2013, Louisiana State University) teaches in the areas of applied behavior analysis, academic assessment and intervention, and behavioral theory and research. Dr. Collins' research has focused on identifying effective and efficient interventions for Black students in urban schools utilizing a social justice framework. Dr. Collins is a Board Certified Behavior Analyst (BCBA-D).

Renee O. Hawkins (Professor, PhD, 2005, University of Tennessee). Dr. Hawkins teaches the practicum sequence and teaches additional assessment, intervention, and research courses. Her research focuses on identifying effective interventions to improve student academic performance and behavior. Dr. Hawkins is a Nationally Certified School Psychologist (NCSP) and a Licensed Psychologist.

Julie Q. Morrison (Associate Professor, PhD, 2001, University of Cincinnati). Dr. Morrison

teaches the measurement and cognitive assessment sequence and systems-level consultation. She also coordinates the Ohio internship. She has extensive evaluation experience with many districts and is Evaluator for Ohio's State Professional Development Grant.

Daniel S. Newman (Associate Professor, PhD, 2009, University of Maryland) teaches courses focused on consultation, behavioral research methods, and the role of the school psychologist. His primary areas of research interest are school consultation training and practice and clinical supervision in school psychology training and practice. Dr. Newman is a Nationally Certified School Psychologist (NCSP).

Lori B. Vincent (Assistant Professor, PhD, 2015, University of Wisconsin). Dr. Vincent teaches core courses in applied behavior analysis as well the behavioral counseling class. Her research focuses on supporting social skill development in children with autism. She is a Board Certified Behavior Analyst and Licensed Psychologist.

Adjunct Faculty

Kimberly Hill, PhD, Adjunct Assistant Professor
Marie Kobayashi, MEd, Adjunct Assistant Professor
Michele McKissick, PhD, Adjunct Assistant Professor
Randolph Siler, PhD, Adjunct Assistant Professor
Stephanie Stollar, PhD, Adjunct Assistant Professor
Amy Storer, PhD, Adjunct Assistant Professor

Support Faculty

Anne Bauer, EdD: early childhood and special education
Cristina Carnahan, PhD: special education
Neil Deochand, PhD: behavior analysis
James Hawkins, PhD: behavior analysis
Todd Haydon, PhD: special education
Steve Kroeger, EdD: special education
Dacia McCoy, PhD: behavior analysis
Ashley Merianos, PhD: health promotion and education
Laura Nabors, PhD: health promotion and education
Mei Tang, PhD: school counseling
Christopher Swoboda, PhD: statistics and research design
Rebecca Vidourek, PhD: health promotion and education

Program Advisory Committee

The School Psychology Advisory Committee (SPAC) includes program faculty and community representatives (e.g., chief supervisors of local districts, administrators, alumni). This group meets a minimum of once per year and is an important vehicle for community input, future planning, collaboration for local professional development, and in general, receiving feedback and input on program planning and direction.

Program Communication

Faculty and student communication is essential and is fostered through several means, including communication in Program courses, semester meetings between Program faculty and each cohort, the Program Blackboard Community, Doctoral Colloquium meetings with all doctoral students in Years 1 through 4, and other student meetings and social events. Student and alumni input are actively sought for curricular and program development

Students are expected to stay in close communication with faculty teaching courses, their advisors/committee chairs and members, and the Program Coordinator to stay apprised of any Program expectations, changes, news, etc. The Program communicates with students initially via the Program Orientation and the *Handbook* (as a primary source of official requirements) and also through communication in required courses, the Doctoral Colloquium, e-mail, the Program Blackboard community, and semester cohort meetings with students/faculty. Students are reminded that University rules **require that faculty and students communicate via e-mail using only the UC account**, not other accounts, so students must **check UC e-mail frequently and correspond with faculty only with these accounts**. It is the responsibility of students to use these methods to stay apprised of Program and University expectations and to bring any questions or concerns to the Program faculty for discussion and resolution.

DOCTORAL PROGRAM OF STUDY

This section provides a comprehensive description of the Doctoral Program in School Psychology (PhD). Specific course requirements by domain are specified in the Curriculum section, followed by the sequence of courses. A table providing an overview of the Program curriculum requirements by year is included in Appendix A.

Program Overview

The Doctor of Philosophy (PhD) in School Psychology is based on a comprehensive 5-year program of study, with 3 years of sequential coursework and integrative field experiences, a year of internship (minimum 1500 hour), Doctoral Comprehensive Examination (completed as portfolio), and research and dissertation requirements. The Master's Degree (MEd in Foundations in Behavior Analysis) is earned upon completion of requirements in Year 1. The program of study is designed to prepare highly competent professional school psychologists as scientist-practitioners who are trained to be both competent consumers and producers of new knowledge and who are broadly trained to deal with diverse and complex problems from a

problem-solving perspective. Doctoral students receive in-depth training in research, behavioral foundations, leadership and systems change, as well as development of skills for professional practice in clinical settings, supervision, and teaching. The doctoral curriculum is based on disciplinary standards for professional psychology and school psychology, including the *Standards of Accreditation for Health Service Psychology* of the American Psychological Association (2015), the *NASP Standards for Graduate Preparation of School Psychologists* (2010) and *Blueprint for Training and Practice – IV* (2006), and the Program’s philosophy and model of training.

The Program has three identified aims of training, linked to discipline-specific knowledge, profession-wide competencies, and learning/curriculum elements required by the profession (APA, 2015). The aims are aligned with the Program’s philosophy and training model and the substantive areas of professional psychology. The following outlines the Program’s aims and competencies.

Aim #1: Students will develop the professional knowledge, skills and dispositions to be ethical practicing school psychologists.

Competencies:

1. Behave in ways that reflect the values and attitudes of psychology, including integrity, accountability, lifelong learning, collaboration, and concern for the welfare of others (Professional values, attitudes, and behaviors).
2. Engage in reflective practice and actively seek and demonstrate openness to feedback for continuous improvement of professional behavior and skills (Professional values, attitudes, and behaviors).
3. Exhibit awareness, sensitivity, knowledge, and skills to work professionally with individuals, groups, other professionals, and communities that represent diverse cultural and personal backgrounds and characteristics, defined broadly and consistent with relevant APA practice guidelines (Individual and cultural diversity).
4. Abide by the current version of the APA Ethical Principles of Psychologists and Code of Conduct (Ethical and legal standards).
5. Be knowledgeable about and adhere to the local, state, and federal laws governing practice (Ethical and legal standards).
6. Relate effectively and professionally with clients, colleagues, and professionals from other disciplines and demonstrate competence in interprofessional collaborative practice, including the ability to manage difficult situations (Communications and interpersonal skills).

7. Communicate clearly and appropriately in written and oral form with clients, colleagues, other health professionals, and the public (Communications and interpersonal skills).

Aim #2: Students will develop knowledge of the scientific foundations of psychology and education to be critical consumers and producers of research.

Competencies:

8. Be able to critically evaluate relevant literature and apply that knowledge in practice (Research).
9. Be knowledgeable about psychological research methods and techniques of data collection and analysis and apply that knowledge in practice (Research).
10. Conduct and disseminate research that contributes to the scientific and professional knowledge base, with a particular emphasis on the use of behavioral research methods (Research).
11. Use research skills for program development and evaluation as well as for quality improvement related to psychological services (Research).

Aim #3: Students will apply knowledge and skills for evidence-based, comprehensive, and data-based psychological service delivery, including both direct and indirect services across professional roles.

Competencies:

12. Select, apply, and appropriately interpret assessments of psychological and behavioral components of physical and mental health to diagnose problems and assess strengths as a basis for planning prevention, treatment, or rehabilitation (Assessment).
13. Provide assessments grounded in the science of measurement and psychometrics and the clinical research related to the assessment of health, behavior, and psychosocial aspects of physical conditions (Assessment).
14. Develop and implement evidence-based psychological approaches in the prevention, treatment, and rehabilitation of common health, mental health, and developmental problems (Intervention).
15. Evaluate outcomes in response to delivered interventions and modify as needed (Intervention).
16. Provide consultative psychological services, including promotion and prevention education, to clients and their families, other health care professionals, and systems related to health and behavior (Consultation and interprofessional/interdisciplinary skills).

17. Be knowledgeable about the core competencies for interprofessional practice and apply that knowledge in collaborative practice (Consultation and interprofessional/interdisciplinary skills).
18. Demonstrate knowledge of supervision theories, models, and effective supervision practices (Supervision).

The Doctoral Program curriculum also provides preparation in all of the NASP content domains, with a strong, pervasive focus across training on data-based decision making and accountability and a consultative approach to practice (system level, group, and individual). The Program is designed, consistent with NASP Standards, to prepare “competent school psychologists whose services positively impact children, families, schools, and other consumers” (p. 2). The Program’s philosophy also clearly reflects the following principles from the Standards:

- School psychologists have a foundation in the knowledge bases for both psychology and education, including theories, models, research, empirical findings, and techniques in the domains, and the ability to explain important principles and concepts.
- School psychologists use effective strategies and skills in the domains to help students succeed academically, socially, behaviorally, and emotionally.
- School psychologists apply their knowledge and skills by creating safe, supportive, fair, and effective learning environments and enhancing family-school collaboration for *all* students.
- School psychologists demonstrate knowledge and skills relevant for professional practices and work characteristics in their field.
- School psychologists ensure that their knowledge, skills, and professional practices reflect understanding and respect for human diversity and promote effective services, advocacy, and social justice for children, families, and schools.
- School psychologists integrate knowledge and professional skills across the 10 domains of school psychology in delivering a comprehensive range of services in professional practice that result in direct, measurable outcomes for children, families, schools, and/or other consumers.

Program coursework and field experiences have been carefully designed to include coverage of all NASP domains in newly adopted (2020) Standards (alignment shown in Appendix A, NASP Matrix). 2020 Standard Domains include:

- Data-based decision making and accountability, which permeate all coursework and field experiences
- Consultation and collaboration (at the system and individual level)
- Academic interventions and instructional supports, with a primary focus on approaches that are evidence-based
- Mental and behavioral health services and interventions, with a primary focus on approaches that are evidence-based

- School-wide practices to promote learning
- Services to promote safe and supportive schools
- Family, school, and community collaboration services
- Equitable practices for diverse student populations, which is an emphasis across courses and field experiences, and which focuses on meaningful individual differences related to promoting positive outcomes
- Research and evidence-based practice
- Legal, ethical, and professional practice

Most of these domains are addressed in an integrative, cumulative fashion over many courses and some are supported by foundation area courses (e.g., Intermediate Statistics, Child Development) in addition to coverage within the School Psychology curriculum. These domains are consistent with Program themes, which provide the Program's areas of emphasis and serve as an organizing framework for training.

The comprehensive training culminates in a full-time (1500 hour) pre-doctoral internship (5th year of study) that is consistent with NASP and APA guidelines and those of the Council of Directors of School Psychology Programs (CDSPP). With the internship and Advanced Experience in Schools and Community Agencies (completed in Year 3), students are eligible for certification as a school psychologist with the Ohio Department of Education (and most other states) and meet training requirements for National Certification in School Psychology. The Doctoral Program, when supplemented with required post-doctoral supervised experience, meets the eligibility criteria for entrance to the Ohio State Board of Psychology licensing examination in psychology. The Program curriculum also includes a sequence of courses verified by the Behavior Analyst Certification Board (BACB) as meeting the coursework requirements under the Fifth Edition Task List for eligibility to take the exam to become a Board Certified Behavior Analyst. Additional supervised experiences are required in order to pursue this credential and are not part of the general program curriculum.

Certification and licensure requirements vary for school psychology (typically governed by states' Department of Education) and psychology (typically governed by states' Board of Psychology). Students are prepared for doctoral practice, research, and leadership in school psychology. Depending on state requirements, some school internships are not aligned with requirements for doctoral-level psychology licensure by the Board of Psychology. Students will learn of these requirements to make informed choices relative to their career goals.

The Doctoral Program is designed for full-time study, and students are expected to retain full-time status until all required coursework (excluding dissertation hours) is completed. There is a Program option for part-time doctoral study for professionals with an advanced degree returning for study. University residency requirements are met in all Program options.

In this section, the requirements and curriculum sequence for the Doctoral-Level (PhD) Program are described. Students are admitted in cohorts for full-time study and complete all school

psychology courses in sequence.

Core Doctoral Curriculum Requirements

Discipline-Specific Knowledge

Biological Aspects of Human Behavior (3 hrs)

PSYC7031 Biological Bases of Behavior across the Lifespan

Cognitive Aspects of Behavior (3 hrs)

PSYC7035 Cognition across the Lifespan

Developmental Aspects of Behavior (3 hrs)

SPSY7043 Child Development

Affective Aspects of Behavior (9 hours)

PSYC7021 Social and Personality Psychology across the Lifespan

SPSY7045 Frameworks for Disabilities and Disorders in Childhood

Social Basis for Behavior (5 hrs)

SPSY9010 Advanced Behavioral Theory and Practice

PSYC7021 Social and Personality Psychology across the Lifespan

History and Systems of Psychology (3 hrs)

PSYC7033 History and Philosophy of Psychology

Psychological Measurement (2 hrs)

SPSY8020 Theories of Measurement for School Psychologists

Research Methodology and Techniques of Data Analysis (39 hrs); includes competency in two research tools of (a) quantitative research methods and (b) behavioral research methods.

EDST7011 Intermediate Statistical Methods

SPSY8012 Behavioral Research and Accountability Methods

SPSY9012 Advanced Behavioral Research Methods and Designs

- SPSY9015 Pre-Dissertation Research in School Psychology (3 hr per semester for 2 terms)
- SPSY9000 Doctoral Colloquia in School Psychology (1 hr per semester for first 3 yrs)
- SPSY9090 Individual Dissertation Guidance (min. 13 hrs)
- EDST8041 Multivariate Data Analysis
- PSYC7050 Methods, Measurement, and Design

Scientific, Methodological and Theoretical Foundations of Practice in School Psychology

Individual Differences in Behavior (3 hrs)

- SPSY7045 Frameworks for Disabilities and Disorders in Childhood

Psychopathology (3 hrs)

- SPSY7045 Frameworks for Disabilities and Disorders in Childhood

Professional Standards and Ethics (9 hrs)

- SPSY7040 School Organization and the Role of School Psychologists
- SPSY7041 Ethics for Behavioral Practice and Research
- SPSY8040 Professional Seminar in School Psychology

Professional Practices in Assessment, Intervention, and Evaluation

Assessment and Diagnosis (11 hrs)

- SPSY7045 Frameworks for Disabilities and Disorders in Childhood
- SPSY8022 Cognitive Assessment
- SPSY8024 Academic Assessment and Intervention
- SPSY8015 Functional Behavioral Assessment

Effective Intervention and Evaluation (18 hours)

Within the University of Cincinnati training model, assessment and planning, intervention, and evaluation of effectiveness are considered part of the same process and the content of these courses reflects this orientation.

- SPSY8027 School-based Behavioral Counseling and Mental Health Interventions
- SPSY8010 Applied Behavior Analysis
- SPSY8011 Applied Behavior Analysis II
- SPSY8014 Applied Behavior Analysis III
- SPSY8024 Academic Assessment and Intervention

Consultation (6 hrs)

- SPSY8030 Behavioral Consultation
SPSY8031 Systems-level Consultation and Program Evaluation in Schools

Facilitating Systems Change, Teaching, Supervision, Leadership, and Staff Development (9 hrs)

- SPSY8013 Behavioral Supervision and Management
SPSY8070 Best Practices in Teaching in Human Services
SPSY9061 Advanced Practical Experience in Schools and Community Agencies

Practica and Internship (14-24 hrs)

- SPSY8061 School Psychology Practicum (6 hrs)
SPSY9061 Advanced Practical Experience in Schools and Community Agencies (6 hrs)
SPSY9065 Internship in School Psychology: Doctoral Level (2-12 hrs)

Cultural and Individual Diversity

This area cuts across multiple curricular requirements and is addressed throughout all core professional courses. Additionally courses in theories of measurement, academic and intellectual assessment, and all intervention courses contain significant related content.

- SPSY7042 Working with Cultural and Linguistic Diversity in Schools

Professional and Personal Models of Practice (9 hrs)

Students continue to apply the scientist-practitioner model to develop a model of practice; critically examine topics in psychology and education, explore emerging scientific knowledge, and develop a plan for continued life-long learning and scholarly inquiry.

- SPSY8040 Professional Seminar in School Psychology
SPSY9000 Doctoral Colloquia in School Psychology

Computer Literacy and Information Technology

Students are expected to attain a level of computer literacy appropriate for the practice of school psychology and knowledge and skills in the use of relevant information technology for professional practice and research. Specific requirements and applications are imbedded in course work, field experiences, and research experiences.

Curriculum Sequence

Core school psychology courses are taken in sequence. Foundation and support courses that are required but that are not individually sequenced are taken across the first 3 years of study, prior to the Doctoral Internship.

Year 1

Overview: Orientation to the profession of school psychology, to research (through participation on research team) and to the Doctoral Program training model; mastery of scientific, methodological, and theoretical foundations for psychology in general and professional practice specifically. The Master's Degree (MEd in Foundations in Behavior Analysis) is awarded in Spring Quarter of Year 1 upon successful completion of all curricular requirements and passing the Master's Comprehensive Examination demonstrating knowledge of behavioral foundations.

<u>Semester</u>	<u>Course</u>	<u>Hours</u>
<u>Fall</u>		
SPSY7040	School Organization and the Role of School Psychologists	3
SPSY8010	Applied Behavior Analysis	3
SPSY8024	Academic Assessment and Intervention	3
SPSY9000	Doctoral Colloquium	1
SPSY8020	Theories of Measurement for School Psychology	2
EDST7011	Intermediate Statistics	3
PSYC7021 or PSYC7031		3
<u>Spring</u>		
SPSY8011	Applied Behavior Analysis II	3
SPSY8030	Behavioral Consultation	3
SPSY8014	Applied Behavior Analysis III	3
SPSY8022	Cognitive Assessment	2
SPSY9000	Doctoral Colloquium	1
PSYC7035 or PSYC7033		3
SPSY7042	Working with Cult. And Ling. Div. in Schools	3
<u>Summer</u>		
SPSY7041	Ethics for Behavioral Practice and Research	3
SPSY7045	Frameworks for Disabilities and Disorders in Childhood	3
SPSY7043	Child Development	3

Year 2

Overview: Development of competencies for professional practice; continued development of research competencies (through research teams, beginning development of an independent research project, and application of internally valid behavioral research design through practicum); continued mastery of scientific, methodological, and theoretical and professional practice knowledge foundations; integration of knowledge and skills across courses; and beginning development of teaching competency through mentored teaching experiences. A Professional Practice Portfolio at the end of Year 2 to demonstrate foundation skills and competencies in professional practice domains and research. This portfolio also is used to evaluate readiness for advanced work in Year 3.

<u>Semester</u>	<u>Course</u>	<u>Hours</u>
<u>Fall</u>		
SPSY8012	Behavioral Research and Accountability Methods	3
SPSY8027	School-based Behavioral Counseling and Mental Health Interventions	3
SPSY8015	Functional Behavioral Assessment	3

Elective		3

Year 4

Overview: Completion of dissertation research

SPSY9090	Doctoral Dissertation Research in School Psychology	13
----------	---	----

Although students are not required to register for the course, students are required to attend Doctoral Colloquium meetings during Year 4 of the Program.

Year 5

Overview: Completion of full-year Doctoral Internship

SPSY9065	Internship in School Psychology: Doctoral Level	2-12
----------	---	------

Independent Study and Field Practicum

Students may elect to take Individualized Study in School Psychology (SPSY8050) when (a) the schedule allows for it and (b) it meets specific learning or field experience goals. Students complete individual contracts for these two courses, available from the Program web site. Students may contract with any individual faculty member to complete the plan. Completed contracts are submitted to the supervising faculty for a signature and copied to the Program

Coordinator for coordination of grading.

Program and Degree Requirements

Continuous Progress Monitoring and Selective Retention

Program expectations and review processes

In order to ensure the development of adequate professional competencies and to ensure satisfactory progress toward degree completion, the faculty continually monitors student performance. Students likewise are expected to engage in goal setting, self-monitoring of progress academically and professionally, and reflection on skills, progress, and areas for continuous improvement, particularly pertaining to goals for doctoral study, including leadership and research skills. This process of review, feedback, and continuous improvement is critical to any applied professional training program. Faculty advisors meet with each advisee each semester to plan the student's program and provide overall feedback on progress in the Program. Specific feedback related to coursework and applied work is provided by instructors and field supervisors. Annually at the end of each training year, students complete a self-evaluation and receive a summary evaluation encompassing faculty and field supervisor ratings across courses and field experiences. As needed, written action plans may be used to set specific targets and goals for improvement, delineate plans, and note review dates and expectations for good progress.

Progress monitoring and selective retention criteria

Students must adhere to University, College, and Program rules and regulations regarding academic performance and professional conduct. Furthermore, because school psychology is an applied profession, all students must demonstrate not only knowledge but skill competency and personal characteristics (dispositions) appropriate to the requirements of the profession. Doctoral students must show strict adherence for research ethics based on Federal statutes, professional ethics, and University regulations through the Institutional Review Board. The following list of criteria describes Program expectations for professional behavior/dispositions. Students are expected to reflect on their own development on these behaviors and faculty and field supervisors also rate students on these behaviors to provide feedback. These criteria also can be the basis for action plans for targeted improvement. As warranted, these criteria may be the basis for selective retention decisions when there is lack of improvement or serious concerns.

On-going evaluation in regard to selective retention is focused on demonstration of the following criteria:

- Adherence to the ethical standards of the National Association of School Psychologists and the American Psychological Association, with conduct becoming a professional school psychologist and researcher;

- Ability to work effectively with parents, families, school personnel, students, supervisors, faculty, and peers in simulated and actual situations;
- Performance in a professional manner as documented by University and/or field supervisors;
- Advancement in developing independent research skills
- Effective thinking and problem-solving skills consistent with professional performance;
- Effective communication skills (written and verbal)
- Receptive attitude toward learning as indicated by attendance and participation in university classes and field experiences and responsiveness to feedback;
- Positive feedback on annual review of progress by faculty based on comprehensive progress monitoring criteria;
- Good progress toward developing independent research skills;
- In personal behavior, dispositions, and characteristics, a student's professional work must be characterized by the following:

Ethical conduct	Positive problem-solving focus
Respect for differences	Responsibility
Adaptability	Independence
Conscientiousness	Initiative and autonomy
Cooperation	Personal stability
Leadership	Professional conduct
Objectivity	Perspective taking
Responsiveness to feedback	Professional dress and appearance

Availability of Personal Information, Professional Behavior, and Professional Dress

Students are required to maintain professional behavior in public life while enrolled in the School Psychology Program. Personal information, opinions, or communications that students make in public or that are posted on websites or through social media outlets should never be offensive to the community, immoral within accepted community standards, or insulting to any person or groups of persons. Students are reminded that they are in a professional training program with high ethical standards. When they are in any field placement or professional site, students must adhere to standards for professional dress, following any dress code for faculty in the setting. A good approach to professional dress is to always be prepared for a potential meeting with parents and/or school administrators.

Academic Performance Requirements

Students must adhere to all University and Colleges rules, policies, and requirements for graduate students. Students also must meet Program requirements for good academic standing, which include:

- Continuation of full-time study

- Maintenance of a GPA of at least 3.5 for all graduate study
- Accumulation of no more than 3 grades of Incomplete at any one time
- Good progress toward degree requirements

In addition, the following standards and policies relate to academic performance.

Academic dishonesty and adherence to research ethics

Academic dishonesty and noncompliance to research ethics are serious offenses and will not be tolerated. Dishonesty in any form, including cheating, plagiarism, deception of effort, or unauthorized assistance and failure to adhere to guidelines for conducting research with human subjects may result in action ranging from a failing grade in a course to dismissal from the Program.

Course grades

Students must earn a “B” grade (3.0 grade points) or higher in all required school psychology courses. If a student does not earn a grade of “B” or higher, the student must work with the course instructor and achieve a "B" level of competency within one semester of receiving the lower grade. According to University policy, the original grade is not changed on the official transcript, but a record is kept in the student's Program file documenting the final level of competence attained following remediation. Failure to remediate a grade lower than a “B” in a required course, more than one "C" in graduate work, or a failing grade in any core professional course is the basis for probationary status and may lead to dismissal from the Program.

Decisions regarding student standing

Selective retention and academic criteria serve as the basis for on-going faculty judgments regarding meeting Program expectations and standards. Students meeting expectations and making good progress are in good academic standing. Failure to comply with these criteria and requirements may result in a range of actions, including use of written action plans (with clear expectations for continued good progress to maintain active status), academic probation, or termination from the School Psychology Program. Concerns of a very serious nature may lead to termination without probationary status. Decisions regarding student academic standing are made by the Program faculty following University rules. Students should refer to Graduate Student Grievance Procedures regarding the appeals process (www.grad.uc.edu). Any student placed on probation will immediately meet with the individual's advisor and develop a written plan of remediation. Upon approval of the plan by the Program Faculty, the student must fulfill remedial plans within a specified period of time for continued advancement of study.

Benchmarks for the PhD Degree in School Psychology

Year 1

- Prior to arriving at UC you are assigned a program faculty advisor. You will meet with your advisor following the required Program Orientation to review your fall semester of study and review foundation requirements and electives needed across your program of study. Be sure to read this Handbook thoroughly following the Orientation to be familiar with all Program requirements.
- Communicate with Program faculty any potential concerns that may impact professional licensure.
- Join professional organizations including NASP, ABAI, APA Division 16, and OSPA.
- Complete all Year 1 Program requirements, including background checks for field work, course work, field requirements, online certification for participation in research, research hours, and completion of logs documenting all hours.
- Register for MEd graduation by University deadlines (www.grad.uc.edu).
- Pass the Master's Comprehensive examination as a requirement for the MEd and a condition for matriculation into Year 2.
- Complete the Annual Student Assessment and Progress Report (April) and meet with your advisor to receive faculty ratings; successful completion of all Program requirements including behavioral expectations necessary for matriculation into Year 2.
- As soon as possible and prior to the start of Year 2, apply for residency in Ohio to be eligible for Ohio resident tuition rates (http://www.uc.edu/registrar/residency_reciprocity_metro.html)

Year 2

- Renew membership to professional organizations.
- Apply for residency to be eligible for in-state tuition.
- Complete all Year 2 Program requirements, including course work, practicum and other field experience requirements, research participation, and completion of logs of all hours.
- With support through SPSY9012 Advanced Behavioral Research Methods and Designs in spring semester, develop a pre-dissertation research idea.
- By mid-spring semester, meet with your advisor to plan for Professional Practice Portfolio.
- By end of spring semester, select a faculty Research Director and under supervision of Director further refine pre-dissertation research proposal and IRB protocol
- Submit the Professional Practice Portfolio (April) to demonstrate a minimum of novice level competency across domains of practice.

Year 3

- Renew membership in professional organizations.
- Complete all Year 3 Program requirements, including advanced field experiences, course work, completion of pre-dissertation research project, teaching experience, and completion of

logs of all hours.

- In early spring semester, meet with faculty advisor to plan Doctoral Portfolio
- Submit the Doctoral (PhD) Portfolio (April) to demonstrate competency for professional practice, research, leadership, supervision, and teaching.
- Meet with faculty advisor and begin searching potential APPIC internship sites of interest for requirements and application instructions.
- Upon successful completion of Doctoral Portfolio, students are advanced to candidacy. Students must select a Dissertation Committee Chair and Members to include in the Advancement to Candidacy Form submitted to the Graduate School. A Dissertation Committee must be composed of a minimum of 3 (maximum of 4) full-time faculty with professional rank, at least 2 of whom are members of the School Psychology faculty. The Dissertation Committee Chair must be a member of the School Psychology faculty.
- Prepare a dissertation proposal under the supervision of Dissertation Chair (summer – early fall of Year 4)

Year 4

- Have dissertation proposal approved by Dissertation Committee (fall).
- Solicit letters of recommendation (early fall) for internship, register for APPIC match, and complete APPIC application by deadline (typically November); attend to additional requirements for different sites.
- Register for dissertation credit each semester.
- Attend Doctoral Colloquium meetings.
- Internship interviews will be conducted in December-January. You will be notified of match results in February.
- Complete dissertation research and defend dissertation to Committee.
- Meet all Program requirements to be certified for Internship (April), including successful completion of all course work, field experiences, and behavior expectations.

Year 5

- In fall, take the School Psychology Praxis examination and submit scores to Program as evidence of mastery of domains.
- Complete all Internship requirements, including at least 1500 hours documented experiences including 600 hours school-based experiences, participation in Internship seminars, training, and appropriate supervision, and required hours of academic credit for the Internship.
- Demonstrate successful completion of internship requirements through the Intern Competency Checklist ratings for non-APA accredited interns and relevant out-of-state placements or evaluations from supervisors from national internship sites.
- Submit all required materials for internship completion, including the Doctoral Internship Portfolio (for non-APA accredited internships), including Intern Program evaluation data if completing an Ohio internship.

- Register for summer PhD graduation by University deadlines.
- Submit all required documents to the Graduate School for graduation.
- Submit employment and contact information to the Program.

A full-time course load is no fewer than 12 and no more than 18 hours of graduate course work per semester. To meet degree requirements for the Master's Degree in Year 1, a minimum of 30 credit hours is required. All students receiving Graduate Assistantships and/or University Graduate Incentive Awards must register for a minimum of 12 hours. Students are required to meet with their Advisor or Chair each semester prior to registration.

Master's Comprehensive Examination

At the end of Year 1, students complete the Master's Comprehensive Examination to meet Program requirements for the Master's (MEd) Degree. This written examination reflects knowledge and mastery of core behavioral theoretical foundations and principles. Successfully completing this examination, along with good performance on selective retention criteria is required for continuation in Year 2 applied and research experiences, including the School Psychology Practicum.

Required Field Experiences

Detailed information on field experiences, including specific requirements and evaluation documents, is included in the *PhD Field Placement Manual*.

Professional Practice Logs

It is the individual student's responsibility to document all field-based training experiences by completing and submitting time and activity logs. Logs must be submitted each semester to supervising faculty for signature and then to the Program Coordinator for inclusion in the student's Program file.

Pre-internship practicum experiences

Across Years 1-3, and prior to enrolling in the Doctoral Internship, doctoral students must complete a minimum of 1000 hours of planned and sequential practicum experience. These experiences occur through required coursework and are supervised by University Faculty and Field-based Supervisors. Field experiences are carefully developed by faculty to assure that students gain experiences with a variety of children (across ages, cultures, disability categories, settings) and that supervision is provided by highly qualified school psychologists. Experiences progress from observation and skill-based practice in Year 1, to integrated practice in school-based and pre-school settings. By the end of Year 2, initial skill competence across domains is accomplished. In Year 3, students gain advanced systems-level experience in schools as well as experience in clinical settings. Field experiences in Years 2 and 3 include weekly supervision by

a licensed psychologist. Practicum and advanced practicum experiences also include weekly on-campus seminars with focused reading and activities to support integration and skill development and practice in self-reflection and peer consultation on cases.

Across the first three years, students need to maintain flexibility in their schedules (outside and work schedules) to allow for flexibility in meeting the field-based practice requirements. An important perspective is that the Program collaborates with schools and other agencies for field-based settings, and UC students work with real students and real situations. As such, trainees need to be able to adjust their schedules to be available for the school and agency calendars, which typically do not align with UC's academic calendar.

Security of student data

As trainees in a professional training program that follows federal privacy laws, all students are required to be aware of and follow federal, state, and district policies for handling of confidential student records and data. Information on these requirements is shared in courses and in specific school experiences. When student data (e.g., graphs; records from observation, interviews, assessments, etc.) are kept by trainees, all documents with identifying information must be secured in a locked box and all electronic records must be secured.

Advanced Practical Experience

Doctoral students complete at least 600 clock hours (min. of 6 credit hours across 2 semesters) of Advanced Practical Experience in Schools and Community Agencies. Students who are already credentialed as a school psychologist will meet with their advisor to determine the amount and types of school experiences that will be required to demonstrate knowledge and skills for doctoral-level practice. The advanced experience takes place in approved school and clinical settings prior to the one-year culminating Doctoral Internship. The advanced practical experience ensures that all graduates have a competent foundation in professional practice.

The Advanced Practical Experience in Schools and Community Agencies (SPSY9061) builds advanced skill competency and knowledge in domains for doctoral-level practice, including facilitating systems-level change and leadership (including supervisory and teaching skills) and effective delivery of psychological services in clinical (non-school) settings. In addition to field-based experiences supporting these domains, students participate in scheduled seminars with reading and discussion.

Each student must construct their Doctoral Portfolio (submitted as the Written Doctoral Comprehensive Examination) to include narrative and entries directly reflective of doctoral experiences in research, teaching, supervision, leadership, change facilitation, and effective delivery of mental health services in clinical settings. As specified in College of Education, Criminal Justice, and Human Services Doctoral Policy, plans for the structure of the portfolio are made in conjunction with the Doctoral Committee at least one semester prior to the submission

date.

Doctoral internship

All students must complete an approved full-year internship following completion of all required coursework (except the dissertation) and passing the written comprehensive examination (submitted as a portfolio). Consistent with NASP and CDSPP guidelines, this internship may be 10 months long (1500 hours) if it is a school psychology internship, with non-school psychology internships typically being 12 months (2000 hours; with 600 hrs school-based). Students are required to enter into the APPIC match to obtain an appropriate internship. If a student is unsuccessful through the match, the Program will work with the student to find an acceptable alternative internship placement. Internship sites not listed in the APPIC directory must meet guidelines adopted by NASP and CDSPP; provide experiences to meet all competencies specified within the Program's *Doctoral Competency Checklist*; be approved by the Program Faculty; provide a structured training experience commensurate with doctoral-level professional practice; provide 4 hours of supervision per week (including 2 hours of individual direct supervision) by a doctoral-level licensed psychologist and licensed school psychologist (if in a school setting); and include a signed agreement specifying all of these requirements.

Decisions about desired placement for doctoral internship are made by the student in collaboration with their Program Advisor and Program Faculty. Students are expected to base their choice on the internship characteristics related to meeting their individual goals as a professional school psychologist. Internship activities and training models vary widely across settings and populations that are served.

If a student does not obtain an internship position through the APPIC match, he/she may elect to complete a Doctoral Internship within the Ohio Internship Program if an appropriately licensed (dually licensed by Department of Education and State Board of Psychology) supervisor can be identified. These internships will be completed consistent with doctoral requirements as described above. For more than 40 years, Ohio has supported an internship program with a primary training mission and training stipends. The Ohio Internship Program is based on legislative appropriations on a bi-annual basis and thus may be subject to change by the Ohio legislature. However, an important context is the strong history of support for the internship program by the Ohio Department of Education and the legislature. Because the Ohio internship program has functioned to support training of school psychologists to meet the Ohio need, students should be award of the **professional and ethical obligation** to serve Ohio schools as a doctoral school psychologist following the internship. The state requires that students who receive state-subsidized internships **must sign a commitment** to employment as a school psychologist in Ohio for at least one year immediately following the completion of training. Students who do not wish to incur this obligation should seek an out-of-state internship. Program faculty view a student's fulfillment of this commitment as an indicator of ethical behavior, as the student has signed a commitment that obligates them to service in Ohio as a condition of receiving an Ohio Internship. As such, failure to keep this ethical obligation will be reflected in

any future ratings or recommendations by faculty. Students should be aware, for example, that criteria for the NCSP include the Program Director's sign-off that the applicant has demonstrated ethical behavior. Doctoral students who complete an Ohio Doctoral Internship participate in monthly Internship Seminars with other Doctoral Interns in the region to support the training mission and doctoral goals.

Pre-internship background checks

Prior to the Ohio doctoral internship, students will complete an application for temporary licensure in Ohio (the process may differ in other states, but all require a level of licensure/certification). Students should be aware that this licensure review process requires a fingerprint check through the Ohio Bureau of Criminal Investigation (BCI) and also the Federal Bureau of Investigation (FBI) for persons who have not been Ohio residents for the past 5 years. This licensure application and review typically occurs in the summer prior to doctoral internship. If any problems are anticipated, the student should inform his/her advisor or Program Coordinator and seek assistance early to avoid delays in licensure. Detailed information on licensure requirements and background checks is available on the ODE website.

Research Requirements

Doctoral students are expected to develop sophisticated knowledge and skills in research methods through both coursework and completion of research experiences. Five distinct strands plus the dissertation contribute to this development: participation in programmatic research projects by faculty and students; the Doctoral Colloquia; required research courses; completion of a pre-dissertation research project leading to a manuscript; and conference presentation proposal submissions.

Research expectations

Active participation in research is expected across all years in the Doctoral Program to prepare doctoral students to be independent researchers who contribute to the literature and for faculty careers. Through progressive membership on research teams with faculty and other doctoral students, students progress from participating in research to being responsible for independent pre-dissertation and dissertation research. In Year 2 during Practicum, doctoral students are guided to conduct internally valid applied designs within their cases and are expected to publish this case in appropriate outlets. The Program expectation is for all doctoral students to be co-authors on a minimum of two publications in referred journals prior to graduation, in addition to the dissertation. We also expect that students will publish the dissertation, with the student as primary author and the Dissertation Chair and Committee Members as co-authors. If the student does not follow through with publication of the dissertation after a reasonable time, the Dissertation Chair will reserve the right to publish the dissertation work with the faculty member as primary author and with co-authorship to the doctoral student. The Program expectation also

is that students will present their work at national, regional, and/or state professional organization meetings. A total of three presentations are expected prior to degree completion.

Doctoral colloquia

All doctoral students enroll for 1 hour of Doctoral Colloquium (SPSY9000) each semester prior for the first three years of the Program. Colloquia (involving all doctoral students) meet regularly during Years 1 through 4 of training, although fourth-year doctoral students are not required to register for credit. Topics include understanding the research process and research ethics, developing research questions and appropriate methodologies, the internship match process, academic and clinical professional positions, and publishing and presenting research. Doctoral students take on progressively advanced roles in research across the years, from participation as research team members, to leading an independent pre-dissertation research project in Year 3.

Research courses

School Psychology Doctoral students complete research requirements for Quantitative Research Methods and Behavioral Research Methods. These areas are based on required courses but also depend on continued student involvement in research through research teams and Doctoral Colloquia, and in guided experiences across the range of core school psychology courses. Basic required courses for the quantitative research tool are PSYC7050 Methods, Measurement, and Design, EDST7011 Intermediate Statistics; and one course in multivariate statistics (EDST8041). The behavioral research method tool is the focus of two specific courses: SPSY8012 Behavioral Research and Accountability Methods and SPSY9012 Advanced Behavioral Research Methods and Design. Given the ecological-behavioral orientation of the program, students also receive extensive instruction and experience in single case accountability design across nearly all intervention courses and practica. Demonstration of the use of elements of research design for intervention accountability is required in the Doctoral Portfolio.

Pre-dissertation research experience

Each doctoral student must complete an independent pre-dissertation directed research experience in school psychology using behavioral research methods. This requirement is completed prior to the Doctoral Internship. The requirement is fulfilled under supervision of a faculty member. Although students can assist each other in these projects, each student is expected to have prime responsibility (with faculty supervision) for a unique research study. A report of the project, written in APA article format and approved by the supervising faculty member, serves as written evidence of the fulfillment of the requirement and is included in the Doctoral Portfolio. The Program expectation is that the study and manuscript are of sufficient quality to be submitted to a refereed journal for publication consideration and for presentation at a national professional conference. Any publications resulting from this experience include the student as first author, and any supporting faculty as co-authors.

Dissertation

Doctoral students prepare an independent research project (dissertation) based on a behavior-analytic approach to problems or methods, to meet doctoral degree requirements. Following admission to candidacy, the student prepares and defends a dissertation research proposal following College and University policies. Students are expected to maintain close and regular contact with their Chair while working on the proposal. The Program encourages students to form dissertation support groups with student colleagues, but these are not to supplant the role of guidance by the Chair and Committee. By nature and design, the dissertation is an independent research project and thus is the primary responsibility of the student. Program policy requires that students defend the dissertation proposal within 1 year of advancement to candidacy. Failure to complete this requirement results in being placed on probationary status, with demonstration of significant progress required for continuation in the Program. As with pre-dissertation research, the Program expectation is that the study and manuscript are of sufficient quality to be submitted to a refereed journal for publication consideration and for presentation at a national professional convention. Any publications resulting from the dissertation include the student as first author, and any supporting faculty as co-authors.

Students must complete an application for study approval through the Institutional Review Board (IRB). The Chair is Co-Investigator in this application.

Professional Practice and Doctoral Portfolios

Students are required to develop, maintain, and submit portfolios demonstrating integration and application of knowledge and skills, proficient practice, and research competence. Portfolios are submitted at three points in doctoral training. At the end of Year 2, the Professional Practice portfolio is submitted to demonstrate professional practice knowledge and skills and development of research skills (including an applied research study developed with a practicum case and preparation for the pre-dissertation research proposal). At the end of all course work (Yr 3), the Doctoral Portfolio serves as a culminating examination requiring demonstrated competence in all areas of program emphases (advanced behavior, research and leadership domains) and includes the pre-dissertation research project (in article format) and entries reflective of professional activities during Advanced Practical Experience in Schools and Community Agencies (leadership, supervision, change facilitation, and effective delivery of mental health services in clinical settings) as well as teaching experiences. Students meet with their Doctoral Chair and other Program faculty to aid portfolio development. Finally, to demonstrate integration and application of knowledge and skills, the Doctoral Internship Portfolio is submitted for students completing an internship that is not APPIC listed/APA accredited. Appendix B contains Portfolio Guidelines and scoring rubrics.

Program faculty reserve the right to modify specific requirements for assessments to assure they correspond to national standards and program goals. Students will be notified of any significant changes to assessments by no later than the beginning of the academic year during which the

assessment is completed.

Professional Organizations

Because of the importance of affiliation with professional organizations for one's continued professional development and for professional advocacy, Program policy requires all doctoral students to become student members of the National Association of School Psychologists, the Association for Behavior Analysis International, APA Division 16, and the Ohio School Psychologists Association. Students who complete an internship outside of Ohio may substitute that internship state's association during the internship year. Membership must be attained by the end of the first semester and continued throughout a student's course of study. Written verification of membership in these organizations is required to be placed in each student's file in the fall of each academic year. Application materials are available on-line from the professional organizations (links are included on the Program web page).

National School Psychology Examination

All students seeking to meet requirements for licensure as a school psychologist through the Ohio Department of Education (or other state licensure/certification as a school psychologist) are required to take the National Examination in School Psychology. For certification in Ohio and most other states, a passing score is required on this examination. Taking the examination prior to graduation allows opportunities for reexamination if needed. Overall, Program students' performance on the National Examination has been outstanding, with a 100% passing rate and mean scores significantly above the national average performance range.

UNIVERSITY RULES AND REQUIREMENTS

Candidacy

A student is advanced to candidacy when: all required coursework is completed with a GPA of at least 3.5; all I, N, and F grades are removed or processed in accordance with College policy; the Doctoral Comprehensive Examination is passed; and requirements for the research tool areas, residency, and pre-dissertation research experience are completed. The student is responsible for applying to be advanced to candidacy and for the completion of required forms.

Dissertation Guidance

Registration in Dissertation Guidance (SPSY9090) is required of all doctoral students and is taken upon advancement to doctoral candidacy. A block of 12 hours of Dissertation Guidance must be taken once.

Dissertation

Students should refer to the [Graduate Handbook](#) for requirements and deadlines regarding completion and submission of the dissertation.

Grading Practices

The School Psychology Program uses the grading practices specified in the [Graduate Handbook](#).

Standards for Graduate Study

At least two-thirds of curriculum requirements must be met by courses, seminars, and other learning experiences offered only to graduate students (courses numbered at the 7000 level or higher). If remedial coursework is taken, it may not be credited toward degree requirements.

Residency

The School Psychology Doctoral Program is designed as a full-time program and residency requirements are met through completing the Program. As required by University policy, students admitted for part-time study must be enrolled in at least 12 hours per semester for 3 out of 5 contiguous semesters (one of which must be fall semester) prior to advancement to candidacy.

Active Student Standing and Leaves of Absence

Because training is highly sequential and cumulative, any breaks in study are highly disruptive. However, on rare occasion significant personal experiences (e.g., illness) may occur that require consideration of a leave of absence. Students must follow University policy to request such a leave. Any student considering a request for leave should first discuss the situation and process with the Program Coordinator and/or the student's Advisor/Chair. If a formal leave is required, the request is first submitted to the Program faculty for review and consideration (form available at <http://grad.uc.edu/student-life/policies/forms.html>). Program faculty will make a determination regarding approval of leave requests, considering progress toward meeting degree requirements and the nature of the situation specified in the stated reason for a change in status. Once approved by Program faculty, the request is reviewed at the College and University levels, with final approval determined by the University Graduate School. Students should be aware that any change in progress with their cohort may affect subsequent decisions such as availability of funding for scholarships, assistantships, and internship assignment.

Time-to-Degree Requirements

University policy specifies total time-to-degree limits. The time limit for the doctoral degree is 9 years, with a 4-year limit for completion of degree requirements following advancement to

candidacy. Program policy is that students will successfully defend the dissertation proposal within 1 year of advancement to candidacy.

As a rule, Program policy is to not routinely recommend that students be granted extensions for completion of their dissertation research requirement beyond the University requirement of 4 years from advancement to candidacy. Any such request for an extension is reviewed by the Program Faculty for consideration of a recommendation to the Graduate School. Final decisions are made by the Graduate School.

Graduation

Each student who has successfully completed all requirements for the PhD in School Psychology must apply on-line (<http://grad.uc.edu/student-life/graduation.html>) to the Graduate School for graduation. According to University policy, before a student can graduate, they must meet the following requirements (a) be registered for at least one graduate credit in their program in an academic year, after having met minimum degree course/candidacy requirements to be considered a graduate student throughout the academic year, (b) complete requirements for any grades of NG, N, I, UP, SP, and F before the Program can certify graduation, (c) receive satisfactory grades for the graduation semester, and (d) complete all Program requirements. The Program certifies that candidates meet all Program requirements, but it is the individual student's responsibility to complete the on-line application and ensure that all requirements for graduation are fulfilled. The University strictly adheres to published deadlines. Graduation deadlines and policies are posted on the Graduate School web site (<http://grad.uc.edu/student-life/graduation.html>).

Admission of Students with Advanced Degrees

Students are admitted at both the post baccalaureate and post master's degree levels. All students are expected to complete all program and course requirements, including the Doctoral Internship. Under College policy, transfer of up to 30 hours of previously taken graduate coursework is permissible following a careful examination of course content by Program Faculty. According to College policy, students must complete a minimum of 90 hours of study. Doctoral committees may modify pre-internship practicum requirements (hours and type) for students admitted with advanced degrees depending on their level and type of experiences, certification, and/or licensure. All doctoral students must complete Doctoral Internship subsequent to their matriculation.

Foreign Language Requirement

There is no foreign language requirement for the PhD in School Psychology.

Right to Review Records

Each student has the right to review personal records maintained by the School Psychology Program as described in the [Graduate Handbook](#). Students should make such a request verbally to their Program Advisor, Committee Chairperson, or the Program Coordinator. Should the student encounter any difficulty in reviewing the actual records, the question should be referred to the School Director, College Dean for Academic Affairs, and then to the University Registrar. Letters of recommendation included in a student file are accessible for review unless the student has waived rights to review in writing. The review of any student record is to be conducted under the supervision of a Program faculty member.

Grievance Procedures and Other Complaint Procedures

Grievance on the part of any student will be processed as described in the [Graduate Handbook](#) and *Graduate Student Grievance Procedures* (available at <http://grad.uc.edu/student-life/policies/grievances.html>). This includes (but is not necessarily limited to) grievances pertaining to: probation, dismissal from a graduate program or alleged improper handling of financial aid. Allegations of discrimination and/or harassment will be handled by the Office of Equal Opportunity (http://www.uc.edu/hr/equal_opportunity.html). Allegations of sexual harassment will be handled by the Title IX Office (<http://www.uc.edu/titleix.html>). Students are encouraged to contact the Ombuds Office for guidance and consultation with University policies and grievances.

APPLICATION, ADMISSIONS, MATRICULATION

Types of Admission

The School Psychology Program makes admission only with "full graduate standing." Students admitted under this standing are entitled to all rights and privileges (as well as subject to all regulations) as any other graduate student in good standing. Only students who enroll full-time for study are eligible for financial aid.

Graduate Record Examination

Effective 2020-2021, the School Psychology faculty will not require the GRE for admissions. Applicants are not required to submit GRE scores when applying to the Program.

The Test of English as a Foreign Language (TOEFL)

The Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is not English - including those with F-1 visas, J-1 visas, and green cards. This test must be taken in the applicant's own country before admission is granted. The minimum acceptable TOEFL score is 520; for the electronic version it is 190.

The TOEFL requirement may be waived for students with a degree from an accredited American college or university in which coursework was taught in English and for students who can document a score of at least 520 in a TOEFL taken in the five years immediately prior to their application to the School Psychology Program at the University of Cincinnati. Waivers may also be granted for students who earned at least a 6.5 on the international English Language Testing System (IELTS) exam or at least a B in the Cambridge CPE exam. Requests to waive the TOEFL requirement should be sent with the appropriate documentation to the Assistant University Dean for Advanced Studies for consideration.

Admission Process

The following is an outline of the process by which prospective students are evaluated and selected for the School Psychology Program. An underlying assumption of the process is that every student who is accepted is seen as capable of successfully completing the program. For this reason, the selection procedure is quite rigorous. Applicants are selected based upon their potential to benefit from the training program and to contribute to the field of school psychology.

A culturally diverse student body is actively recruited, and applicants of academic and professional promise are not systematically excluded on the basis of race, ethnicity, gender, age, disability, religion, lifestyle, or sexual orientation. The admissions process is highly selective but flexible. The profession of school psychology requires that the practitioner possess positive personal characteristics as well as academic and technical competence based on both objective and qualitative information.

1. The decision-making process regarding admissions begins on December 1; applicants are strongly encouraged to complete their files by that date. However, applications are accepted until all program vacancies have been filled. After December 1, prospective applicants may wish to contact the Program to determine the status of Admissions decision making.
2. Admission materials are available on-line (<http://grad.uc.edu/admissions.html>).
3. Items required to complete the application process include submission of the following items on-line and to Admissions Coordinator, School Psychology Program, University of Cincinnati, P.O. Box 210068, Cincinnati, OH 45221-0068:
 - Application for admission (apply on-line at <http://grad.uc.edu/admissions.html>)
 - Current vita (resume; uploaded with online application)
 - Transcripts (unofficial can be uploaded with the application; official should be mailed to P.O. Box 210068 with acceptance of admission and following degree conferral)
 - Goal statement The goal statement should include an explanation (up to 3 pages in length) of why you have chosen to pursue a career in school psychology and graduate study at the University of Cincinnati (uploaded with application)

- Three letters of evaluation/recommendation These letters are submitted by the recommender through the on-line application system. At least one letter should be from a person familiar with your academic performance.
4. Confirmations are sent to the applicant to acknowledge receipt of material and to indicate when the application is complete.
 5. Faculty members review the individual files as they are completed. An initial screening is based on a careful consideration of:
 - (a) Academic record - grades, previous coursework
 - (b) Letters of evaluation/recommendation
 - (c) Goal statement - compatibility with program and research goals for doctoral study
 - (d) Relevant work and life experience (vita)

All criteria are carefully considered in admissions decisions.

6. A meeting of the School Psychology faculty is held during which the applications are reviewed and discussed. At this point, a decision is reached as to which students will be invited for an interview.
7. Prospective students are invited for an interview with faculty members and current students. At this time, applicants also have the opportunity to ask questions of faculty and students in order to familiarize themselves further with the Program.

NOTE: If geographical constraints prohibit a personal interview, a phone or video interview may be conducted.

8. After the interview, an assessment is made based on the applicant's record and their:
 - (a) Career goals and their alignment with the Program philosophy and goals for doctoral study
 - (b) Potential for successful completion of the Program
 - (c) Alignment with the Program's stated criteria for Continuous Progress Monitoring, especially, sensitivity to the needs of children, families, and school personnel, interpersonal skills, communication skills, both oral and written, respect for diversity, initiative, and potential for leadership.
9. As the interviews are completed, a prioritized list of acceptable candidates is compiled by the School Psychology faculty. Offers of admission are made to the top candidates based on the number of openings in the Program. The additional acceptable candidates are placed on a waiting list. Those offered admission are requested to respond with their decision within a specified time period consistent with The Council of Graduate Departments of Psychology. Applicants on the waiting list may be offered admission if additional vacancies occur.

Prerequisite Coursework

It is highly recommended that applicants have an undergraduate major or strong background in psychology or a closely-related field. Although applicants from other areas are accepted into the Program, a firm foundation in psychology will prove beneficial to the student in advanced study. As a general guideline, it is suggested that prospective students have a minimum of 18 semester hours in psychology distributed over the following areas:

History and Systems of Psychology	Research and Statistics
Child Development	Social Psychology
Biological Bases	Learning Theory

In addition, a minimum undergraduate GPA of 3.0/4.0 is recommended for admission to the Doctoral-level Program. A 3.0 GPA in the student's undergraduate major is required.

Transfer of Credits

As a means of assuring that standards embodied in graduate degrees at the University of Cincinnati and training standards in school psychology (e.g., NASP, APA) are preserved, transfer of credits from other institutions is carefully monitored. For students matriculated in the Doctoral-level Program, the faculty advisor carefully reviews prior coursework and, in consultation with the full faculty, approves/disapproves transfer of credits to meet degree requirements. In any case, students must meet all course requirements, whether taken at the University of Cincinnati or at other institutions.

At least 1 year of full-time study must be completed at the University of Cincinnati. Full-time study is defined under "Residency."

Tuition and Fees (Fall 2020)

Ohio Residents	\$7,451/ Semester
*Metro Rate	\$7,451/ Semester
Non-Residents	\$13,232/ Semester

*The University of Cincinnati has an agreement to offer a Metropolitan Rate with several Kentucky and Indiana counties. New students do not need to apply for the rate, it is determined from the permanent application address.

After living in Ohio (or Metro counties in Kentucky or Indiana) for one year, out-of-state students should apply for residency to qualify for in-state tuition. Even if their tuition is covered by a Graduate Assistantship, students should still seek in-state status.

Financial Assistance

The School Psychology Program actively assists as many students as possible in obtaining financial assistance. Over the past several years, all students have received aid.

<u>Type of Assistance</u>		<u>Approximate Value</u>
Graduate Incentive Award	Varies	\$10,000- 20,000
Graduate Teaching, Research, Administrative Assistantships	Full Tuition + Stipend	\$24,790- 36,532
Yates Fellowships (Under-represented groups)	Full Tuition + Stipend	\$24,790- 36,532
Yates Scholarships (Under-represented groups)	Full Tuition	\$12,790- 24,532
Gabbard Fellowship (Honorary)	Full Tuition + Stipend	\$24,790- 36,532
Resident Graduate Advisors	Varies (stipend + room & board)	
Loans, Grants	Available	
Part-time Employment	Available	

The University Financial Aid Office at the University Pavilion (www.financialaid.uc.edu; 513.556.9900) can provide additional information and assistance.

Registration Procedures and Requirements

Newly admitted students must complete several pre-registration requirements before registering for classes.

Registration

You must see your Program Faculty Advisor each semester prior to registering. In registering for courses and completing the coursework included in your program, the following steps and materials will be helpful.

1. Make an appointment with your advisor prior to registering.
2. Review courses for availability and time on <http://onestop.uc.edu/>
3. Meet with advisor to review Handbook and plan courses.
4. Register on-line at <http://onestop.uc.edu/>
5. For any changes in registration, obtain permission of your advisor.
6. If needed, obtain Drop/Add Forms (if class is not full, you can drop/add on-line)
7. Obtain Change of Grade Form as needed (also can be completed on-line by Instructor)

Registration Change Procedure

Alterations to the student's schedule involving the addition of one or more classes, changes in class sections, or changes in credit status, may be submitted by logging in to the [web registration system](#) or by submitting a paper form. The "Registration Change (Add/Drop) Form" may be obtained from the student's college or from the One Stop Student Service Center (University Pavilion 2nd floor) or a regional campus registration office.

From the eighth (8th) day of the term through the fifteenth (15th) day of the term, additions to a class schedule requires only the approval of the instructor. Thus, only the class instructor's signature is required on the "Registration Change (Add/Drop) Form" through the fifteenth day of the term. A college signature is not required.

Beginning with the sixteenth (16th) day of the term, however, both the approval of the instructor and the college are required, and so the "Registration Change (Add/Drop) Form" must be signed by both the instructor and a representative of the college offering the class.

The completed and signed "Registration Change (Add/Drop) Form" must be submitted in person to the One Stop Student Service Center, or regional campus registration office.

Audit Regulations

The audit option is intended for cases in which coursework is desired or advised but in which a grade is deemed unnecessary by the student in consultation with the student's Program Advisor or Committee Chairperson. Admissions and conditions for participation in audit courses are at the discretion of the instructor, who is not obligated to accept a student for audit. Audited courses cannot be used to satisfy any graduate degree course requirements. Audited courses cannot be charged to a GIA unless 12 graduate credits are taken that same semester (and if the total is less than 19 credits). Further, no more than one audit course may be charged to a GIA in any academic period.

Pass/Fail Courses

A graduate student may not take courses for graduate credit on a pass/fail basis, except when approved by the student's Program Advisor. In the School Psychology Program, some practicum and internship courses may be graded pass/fail. At times, some individual study, readings, or special topics activities may be graded pass/fail.

Inappropriate Courses

Nonacademic courses, courses unrelated to the student's graduate program, and undergraduate courses cannot be charged to a GIA.

Withdrawals

Before withdrawing from any course, you must obtain the approval of your advisor and must adhere to Program requirements regarding courseload. After the 15th calendar day of the term (consult the appropriate [academic calendar](#) for summer term dates), but within the term, the student may withdraw from one or more classes, as follows:

- Students may withdraw from classes through web registration if the instructor permits web withdrawals (refer to the instructor's class syllabus). Students and instructors both will receive e-mail notification of the withdrawal. Students are assigned a "W" grade at the time of the withdrawal, but instructors reserve the right to change the "W" to an "F" through the final grading process.
- Students may also withdraw from classes in person by submitting a completed "Registration Change" form to the One Stop Student Service Center (University Pavilion, 2nd floor) for processing. The last day to withdraw from a class is the 58th calendar day of the term (consult the appropriate [academic calendar](#) for the specific date).

POLICIES AND PROCEDURES FOR GRADUATE INCENTIVE AWARDS AND GRADUATE ASSISTANTSHIPS

Policies, procedures, rights and responsibilities pertaining to Graduate Incentive Awards (GIAs) in the School of Human Services are based upon the [Graduate Handbook](#) and interpreted or clarified in this document. Copies of the [Graduate Handbook](#) may be obtained through the Office of Research and Advanced Studies (www.grad.uc.edu). All faculty, staff and graduate students seeking Graduate Incentive Awards should familiarize themselves with both this document and the [Graduate Handbook](#).

Graduate Incentive Awards

Graduate Incentive Awards shall be awarded based on merit and financial need as judged by the faculty holding the responsibility for making decisions regarding financial aid. The awarding of Graduate Incentive Awards (GIA) shall be by the Director of the School of Human Services in a letter which outlines the conditions of the award.

All awards are for a period of 1 academic year (fall and spring semesters) or for 1 summer term. The award will pay partial-full tuition costs for 12-18 graduate credit hours each semester

(graduate academic credit only). Students are encouraged to register for at least 15 credit hours each term, but must register for at least 12 credit hours. In accordance with Program policy, written permission must be obtained to register for less than 12 hours per semester. Only graduate credit hours count toward this requirement. Registration for more than 18 credit hours will require the student to pay for those hours in excess of 18. A student's eligibility to be awarded a GIA is limited to no more than 4 years at the doctoral level. GIAs will not be awarded to students who have accumulated 174 or more graduate credit hours.

A Graduate Incentive Award will not cover the general fee unless specifically indicated in the award letter.

An applicant for financial aid must confirm his/her acceptance of the award offered within 10 days of the date of the award letter. If acceptance of the award is not confirmed within this period of time, the offer is automatically withdrawn unless a specified extension has been granted by the Program Coordinator and approved by the School Director.

Termination of Award

Termination of the award may be initiated by the financial aid recipient, the School Director or the Dean of the Graduate School.

Award recipients wishing to terminate the award prior to the expiration date must notify the School Director **in writing**. Except in emergency situations, such early terminations should occur only at the end of an academic term.

If termination during an academic term results from self-initiated action by the award recipient for other than medical reasons, s/he may be required to repay tuition costs for that semester.

Termination also may be based on unsatisfactory academic performance (including unsatisfactory progress in the degree or certification program of study), or academic dishonesty. Immediate termination also may result if the award recipient fails to maintain full-time student status (a minimum of 12 graduate credit hours each term). Termination based on unsatisfactory academic performance will become effective at the end of the academic term during which the termination decision is made.

Termination based on academic dishonesty may become effective prior to the end of the academic semester.

Procedures for appeal and possible redress of grievances pertaining to Graduate Incentive Awards are set forth in *Graduate Student Grievance Procedures*.

Graduate Assistantships

Policies, procedures, rights and responsibilities pertaining to graduate assistantships in the School of Human Services are based upon the [Graduate Handbook](#) and interpreted or clarified in this document. Copies of the [Graduate Handbook](#) may be obtained through the Office of Research and Advanced Studies (www.grad.uc.edu). All faculty, staff and graduate assistants should familiarize themselves with both this document and the [Graduate Handbook](#).

Appointments and Reappointments

- A. All graduate assistant appointments or reappointments are for a period of one academic year (nine months) beginning August 15 and terminating with the fulfillment of normal academic responsibilities (examinations and the submission of grades) for the spring semester. Graduate Assistant appointments are limited to a maximum of three years. Graduate Assistantships will not be awarded to students who have accumulated 174 or more hours.
- B. Applications should be submitted to the School Office by Feb. 1 of the preceding year. The applicant should clearly indicate on the top of the application which assistantship(s) is being sought (e.g., School Psychology).
- C. Appointments will be made by the School Director upon the recommendation of the coordinator for the appropriate Program by April 15 when possible.
- D. An applicant must confirm in writing their acceptance of the award offered within 10 days of the date of the award letter. If acceptance of the award is not confirmed within this period of time, the offer will be withdrawn unless a specified extension has been granted by the Program Coordinator.
- E. Appointment decisions will be based upon the anticipated ability of the applicant (1) to meet the programmatic needs associated with the specified position and (2) to gain professionally as an individual from the assistantship experience. Such decisions shall be based upon the qualifications of the applicants and not upon the Programs in which they are enrolled.
- F. Reappointment decisions will also be based upon an evaluation of the applicant's prior work-related performance as a graduate assistant. Procedures for conducting such evaluations will be determined by the programs which administratively house the assistantships.

Job Descriptions

- A. Descriptions of the responsibilities associated with each assistantship have been developed by the respective programs. Desirable or required qualifications for each assistantship are included in or based on those job descriptions.

- B. Graduate assistant responsibilities will be based on an average of 20 hours of work-related activities per week. Although assigned work may vary at times during the year, 20 hours will be the maximum average demand for all GAs.
- C. Although a graduate assistant may be assigned to and/or supervised by individual faculty, they will report directly to the Program Coordinator. All requests for work must be approved at the Program level by the Program Coordinator.

Termination during Period of Appointment

- A. Termination may be initiated by the Graduate Assistant, School Director, or Dean of the Graduate School.
- B. Graduate assistants wishing to terminate their appointments prior to the established termination date must inform the School Director in writing 30 days prior to the proposed termination date. Except in emergency situations, such early termination should not occur except at the end of an academic term.
- C. If termination during an academic semester results from self-initiated action by the graduate assistant for other than medical reasons, she/he may be required to repay tuition for that semester.
- D. Termination may be based on unsatisfactory academic performance (including unsatisfactory progress in the degree or certification program of study), unsatisfactory performance of assigned work-related responsibilities, or academic dishonesty. Termination will also result if the graduate assistant fails to maintain full-time student status (minimum of 12 graduate credit hours each semester).
- E. Termination based on unsatisfactory academic performance or unsatisfactory performance of work-related responsibilities will become effective at the end of the academic semester during which the termination decision is made unless the situation is judged by the School Director and Associate Vice President for Research and Advanced Studies to be seriously adverse to the academic program to which the GA is assigned.
- F. Termination based on academic dishonesty may become effective prior to the end of an academic term. In such cases, compensation to the graduate assistant shall also terminate on the date of the appointment termination.
- G. In emergency situations where a graduate assistant is unable to continue meeting their assigned responsibilities, termination will not be effective until the end of the academic semester. In such cases, compensation to the graduate assistant will continue until the end of the term. Furthermore, in such cases, the graduate assistant's inability to continue meeting

their assigned responsibilities will not in itself adversely influence decisions regarding reappointment. Such decisions will be based upon the criteria and in accordance with the procedures regarding all reappointment decisions.

- H. Except as noted above, all termination procedures will be in accordance with the guidelines set forth in the *Graduate Handbook*.

GA Rights, Responsibilities, and Grievance Procedures

- A. Additional rights and responsibilities of graduate assistants are outlined in the *Graduate Handbook*.
- B. Procedures for appeal and possible redress of grievances arising out of a graduate assistant's academic relationship with the School, College, or University are set forth in [Graduate Student Grievance Policies](#)

Course Load

- A. The normal academic load for graduate assistants is a minimum of 12 graduate hours each term. A maximum of 3 additional hours of credit may be taken upon the specific approval of the Program Coordinator.

APPENDIX A

Program Curriculum Overview

NASP Matrix

School Psychology Doctoral-Level (Ph.D.) Program Curriculum

Year	Fall	Spring	Summer

NASP Training Standards (Domains)

- 1 Data-Based Decision-Making
- 2 Consultation and Collaboration
- 3 Academic Interventions and Instructional Supports
- 4 Mental and Behavioral Health Services and Interventions
- 5 School-Wide Practices to Promote Learning
- 6 Services to Promote Safe and Supportive Schools
- 7 Family, School, and Community Collaboration
- 8 Equitable Practices for Diverse Student Populations
- 9 Research and Evidence-Based Practice
- 10 Legal, Ethical, and Professional Practice

APPENDIX B

Doctoral Portfolio Documents

University of Cincinnati, School Psychology Doctoral Program

Portfolio Requirements:

Second Year Professional Practice Portfolio

Doctoral Portfolio

Internship Portfolio

This document is written as a guide to students in developing portfolios. The School Psychology Doctoral Program requires the use of portfolios to document and assess student skill attainment, knowledge integration and application, and readiness for doctoral-level practice. At the Doctoral level, portfolios are used for assessment at three points in training (a) the Second Year Professional Practice Portfolio, submitted near the end of Year 2 of training, (b) the Doctoral Portfolio, submitted as a culminating examination at the end of Doctoral course work, near the end of Year 3, and the Internship Portfolio, submitted at the end of the Doctoral Internship (Year 5).

Use of the Portfolios in Assessment of Student Progress/Readiness and Program Assessment

Portfolios are used by the faculty for two important purposes: assessment of individual student progress and overall program assessment for continuous improvement planning. In rating individual student progress, Portfolio assessment is used to assess student skill attainment, knowledge integration and application, and student readiness for practice. The Second Year Professional Practice Portfolio assesses competency of core knowledge and skills from the first two years of course work and field experiences and readiness for more advanced doctoral-level practice in Year 3. The Doctoral Portfolio assesses competency in the areas of focus for advanced doctoral work – leadership/systems change, research (Pre-Dissertation research study), teaching, clinical practice, and supervision. Passing this Portfolio results in Advancement to Candidacy. The Doctoral Internship Portfolio assesses readiness for independent practice as a doctoral-level school psychologist at a mastery level of competency.

At the Program level, the Program faculty review aggregated student portfolio ratings and performance each year to examine trends of student learning and mastery. Results of this analysis lead to areas for Program improvement, curricular modifications, and/or instructional or practice modifications to assure that all students have the required level of competency.

In addition to these Program assessment purposes, students should be aware that the Portfolio can serve other important purposes. Interviews for Internship placement often require that the prospective intern bring portfolio examples to demonstrate the prospective student's skills and to assist in matching the intern with supervisors. The Doctoral Internship portfolio is an excellent

tool for use for interviewing for school psychology positions, again demonstrating areas of competency and particular skill focus.

General Guidelines for Portfolio Development

Case/entry selection. Candidates are advised to select cases for the Portfolio that are representative of your skills and demonstrate application and integration of knowledge and skills. However, faculty members are aware of the constraints of applied research and school practice, and perfection of cases is not expected. Rather, we expect that in your case discussion/reflection you thoroughly discuss any areas of variation from best practices, your learning from the situation, and your plan to assure future alignment with best practices.

Table of contents and table of cases/entries. Candidates must include a table of contents demonstrating organization of the portfolio. Dividers should be used for sections. Candidates also must include a table demonstrating how cases align with the required content of portfolios (NASP domains and Program required content).

Vitae. Candidates must include a current copy of their professional vitae in the Portfolio.

Format. Portfolios at all levels of training are submitted electronically, as a PDF, to the Program Director by the specified date.

Confidentiality. All personally identifying information for individuals (students, teachers, etc.) must be deleted from all portfolio materials. You do not need to blind names of settings (school, district).

Scoring. Portfolios are scored using the attached rubrics. You will receive a copy of your scored rubrics. Portfolios overall must receive a minimum of a rating of 3 “competent.” Any entries receiving less than a “3” rating must be revised to meet this standard. The method for revision is individually determined by faculty to reflect what is needed to demonstrate competence for that case. Typical revision could include a requirement for revision and resubmission and/or an oral examination to allow for additional explanation.

Requirements of the Portfolios

The attached Table summarizes the key requirements of portfolios, including when submitted, entries to be included, and method of evaluation. Scoring Rubrics for the Second Year Professional Practice Portfolio, the Doctoral Portfolio, and the Internship Portfolio also are attached.

At the Second Year Professional Practice Portfolio level, key requirements include the Model of Practice and 5-7 case entries, reflecting competency across domains and across tiers of services delivery. Case entries must include work from all required practicum, including academic and behavior cases, across tiers and settings, functional behavior assessment, and counseling group.

At the Doctoral Portfolio level, key requirements include entries reflecting advanced doctoral work, including entries for systems change/leadership, research (Pre-Dissertation study), teaching, practice in clinical (non-school) settings, and supervision.

At the Doctoral Internship Portfolio level, key requirements are the final Intern Competency Checklist ratings and case entries reflecting competency across all NASP domains and across tiers of services delivery, including eligibility determination.

Second Year Professional Practice Portfolio

The primary purposes of this portfolio are to (a) demonstrate mastery of all domains of practice aligned with NASP Standards and APA Guidelines, (b) articulate your model of practice, reflecting NASP Standards, APA Guidelines, and Program themes, integrated into your own personal model of practice, (c) integrate knowledge and skills as demonstrated in the required case entries, and (d) for each case entry, demonstrate understanding of best practices through your case discussion/reflection, discussing alignment of the case with best practices/your model of practice and thoroughly discussing any areas lacking alignment with best practices/your model of practice.

Personal model of practice. This entry is a 3-5 page statement that explicates your model of practice, incorporating both NASP Standards and Program themes. The expectation is for a thorough, detailed, and well-integrated discussion reflecting good understanding of all elements and the interrelated nature of elements. Please see the Scoring Rubric for scoring guidelines.

Individual, group, and system-level case entries. All case entries should include thorough yet concise discussion of all components of the “case” – incorporating important contextual information; all phases of problem solving; assessment methods and results; all aspects of intervention planning, development, and implementation; collaboration across phases; and data-based decision making. Expectations are for thorough, detailed, well-integrated understanding of all components of effective practices, including a discussion of any variance with best practices. Doctoral students are expected to have one case entry that uses an internally valid behavioral research design integrated into practice (e.g., a comparison of instructional methods).

Case entries should include your narrative description, following APA format and style (consistent with expectations for Practicum cases), as well as copies of relevant materials to demonstrate key aspects of the case (e.g., graph of progress data; intervention scripts). Entries showing individual data paths should mask all identifying information.

Doctoral Portfolio

The primary purpose of this portfolio is to be the culminating examination following the completion of all course work and the Pre-Dissertation research requirement. Entries reflect the focus of your advanced doctoral study, including required entries in systems-level change,

teaching, supervision, effective delivery of mental health service in clinical (non-school) settings, and research. This Portfolio must demonstrate mastery at a passing level to be advanced to Doctoral Candidacy.

Doctoral Internship Portfolio

The primary purposes of this portfolio, along with the comprehensive Intern Competency Checklist, are to demonstrate mastery of all NASP domains and APA competencies and to demonstrate readiness for independent practice as a competent doctoral-level school psychologist. For students completing a school-based internship that is not APPIC listed/APA-accredited, entries include comprehensive case entries representative of practices at the systems level (Tier 1), targeted student level (Tier 2), and individualized student level (Tier 3), including a case entry representative of practices for determining eligibility within a Response to Intervention (RtI) framework and showing compliance with Federal and State requirements. Students completing an APPIC-listed/APA-accredited internship are not required to submit a Doctoral Internship Portfolio.

Individual, group, and system-level case entries. All case entries should include thorough yet concise discussion of all components of the “case” – incorporating important contextual information; all phases of problem solving; assessment methods and results; all aspects of intervention planning, development, and implementation; collaboration across phases; and data-based decision making. Expectations are for thorough, detailed, well-integrated understanding of all components of effective practices, including a discussion of any variance with best practices.

Case entries should include your narrative description, following APA format and style (consistent with expectations for Practicum cases), as well as copies of relevant materials to demonstrate key aspects of the case (e.g., graph of progress data; intervention scripts). The eligibility determination case entry must include a completed Evaluation Team Report (ETR) and any accompanying reports and data/graphs, with all identifying information masked (including student and team member names).

Doctoral-Level Portfolio Requirements

Year	Task	Due	Content	Method of Review
1	Meet with advisor to look at portfolio examples	Winter or Spring		
2	Professional Practice and Research Portfolio	April	<ul style="list-style-type: none"> - Model of practice narrative - Third-year research project proposal and completed IRB protocol - Tiered consultation and counseling practicum experiences <ul style="list-style-type: none"> - Minimum of 5 entries, maximum of 7 - Entries must include academic, behavior, FBA, and group counseling - Must include cases from both preschool and K-12 settings - One of the academic or behavioral entries must involve an individualized intervention - At least once entry must involve meaningful parent contacts - At least one entry should include a single case design - All entries include a narrative linking the case to professional model of practice - One case should highlight a meaningful approach to diversity (explicit linkages between intervention and cultural factors) - One case should highlight the consultation process (explicit description of moving through consultative problem-solving process) - One case should include effect size estimates 	Faculty review Ratings of each entry using scoring rubric
3	Doctoral Portfolio (for	April	- Third-year research project	Faculty review

Year	Task	Due	Content	Method of Review
	Advancement to Candidacy)		- Planned leadership and systems change experiences including facilitation, staff development, teaching, supervision, and effective delivery of psychological services in clinical settings	Ratings of each entry using scoring rubric
5	Doctoral Internship Portfolio	April	<p>- For non APPIC-listed/APA-accredited school-based internships, tiered consultation and counseling experiences</p> <ul style="list-style-type: none"> • Seven entries required • Entries must include 1 academic and 1 behavioral at each tier + a systems level entry • At least one entry must reflect RtI approach to eligibility decision making and must include an Evaluation Team Report and supporting documents • Entries must include data and data summaries meeting criteria for the state-wide internship evaluation (OH interns) <p>- All entries include a narrative linking the case to professional model of practice</p>	Faculty review Ratings of each entry using scoring rubric

Second Year Doctoral Professional Practice Portfolio Scoring Rubric

Student _____ **Faculty Rater Initials** _____ **Date** _____

TIER 1 ACADEMIC OR BEHAVIOR ENTRY: Note nature of entry

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Needs assessment conducted as appropriate for activity; use of universal screening data				
Evidence of collaboration with key individuals/groups				
Use of scientifically-based, research-based practices				
Understanding of systems and organizational contexts, including diversity				
Intervention plan detailed, thorough, appropriate and linked to assessment				
Use of systematic problem-solving process				
Application of data-based decision making				
Evaluation plan appropriate for activity				
Case discussion complete, reflecting understanding of best practices				
Overall rating				

Comments:

Scoring:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning advanced doctoral study and internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for the beginning advanced doctoral study and internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for advanced doctoral study and internship; but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills for advanced doctoral study and internship; remediation required to meet the standard

TIER 2 ACADEMIC OR BEHAVIOR ENTRY: Note nature of entry

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Use of appropriate universal screening ; Tier 1 data				
Evidence of collaboration with key individuals/groups				
Use of scientifically-based, research-based practices				
Appropriate target selection				
Appropriate problem analysis for intervention targets				
Understanding of systems and organizational contexts, including diversity				
Intervention plan detailed, thorough, appropriate and linked to assessment				
Intervention adherence data collected				
Use of systematic problem-solving process				
Data-based decision making application (including decision rules, technically adequate graph)				
Case discussion complete, reflecting understanding of best practices				
Overall rating				

Comments:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning advanced doctoral study and internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for the beginning advanced doctoral study and internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for advanced doctoral study and internship; but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills for advanced doctoral study and internship; remediation required to meet the standard

TIER 3 ACADEMIC OR BEHAVIOR ENTRY: Note nature of entry

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Use of appropriate universal screening ; Tier 1 & 2 data				
Evidence of collaboration with key individuals/groups				
Use of scientifically-based, research-based practices				
Appropriate target selection				
Appropriate problem analysis for intervention targets				
Understanding of systems and organizational contexts, including diversity				
Intervention plan detailed, thorough, appropriate and linked to assessment				
Intervention adherence data collected				
Use of systematic problem-solving process				
Data-based decision making application (including decision rules, technically adequate graph)				
Case discussion complete, reflecting understanding of best practices				
Overall rating				

Comments:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning advanced doctoral study and internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for the beginning advanced doctoral study and internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for advanced doctoral study and internship; but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills for advanced doctoral study and internship; remediation required to meet the standard

MODEL OF PRACTICE

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Family and child advocacy (competence enhancement; promotion of positive outcomes)				
Scientist-practitioner framework as basis (legal/ethical, data-based practice & accountability, research-base)				
Ecological/behavioral orientation to practice, including meaningful approach to diversity				
Problem-solving approach for prevention and intervention; data-based decision making; linking assessment/intervention				
Collaboration and collaborative approaches across activities				
Leadership and initiative (adherence to model, advocacy)				
Overall rating				

Comments:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning advanced doctoral study and internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for the beginning advanced doctoral study and internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for advanced doctoral study and internship; but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills for advanced doctoral study and internship; remediation required to meet the standard

Overall rating				

Comments:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning Doctoral internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for beginning Doctoral internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for entry-level competence for beginning Doctoral internship, but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills; not yet competent for entry-level practice and beginning Doctoral internship; remediation required to meet the standard

SUPERVISION ENTRY

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Needs assessment, baseline data conducted as appropriate for activity				
Evidence of collaboration with key individuals/groups				
Use of research-based supervision practices				
Understanding of systems and organizational contexts, including diversity				
Supervision plan detailed, thorough, appropriate				
Use of systematic problem-solving process and data-based decision making within supervision practices				
Evaluation plan of supervision effectiveness appropriate				
Discussion complete, reflecting understanding of best practices in supervision				
Overall rating				

Comments:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning Doctoral internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for beginning Doctoral internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for entry-level competence for beginning Doctoral internship, but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills; not yet competent for entry-level practice and beginning Doctoral internship; remediation required to meet the standard

TEACHING ENTRY

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Description of effective course design elements				
Development of clear course objectives, linked to the most up-to-date research on the topic				
Alignment between course objectives, assessments, and instruction				
Use of formative and summative assessment				
Evidence-based instructional practices, including active learning strategies to engage students in their learning				
Promoting a positive and collaborative learning environment				
Utilize effective educational technology to support learning outcomes				
Accessibility of course and content with attention to Universal Design for Learning standards and 508 compliance.				
Discussion complete, reflecting understanding of best practices in teaching and incorporation of evaluation data				
Overall rating				

Comments:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge; beyond entry-level competence for beginning Doctoral internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge; entry-level competence for beginning Doctoral internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge for entry-level competence for beginning Doctoral internship, but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge; not yet competent for entry-level practice and beginning Doctoral internship; remediation required to meet the standard

RESEARCH ENTRY

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Literature review is well-written, thorough, concise and builds foundation for purpose of study				
Thorough and relevant referencing of appropriate studies to build foundation for study				
IRB protocol submission procedures followed				
Methods section is well written, thorough, concise, and includes all key elements for study				
Tables and graphs are completed correctly and include relevant data				
Discussion of study results is well written, reflects understanding of limitations and implications of study				
Overall rating				

Comments:

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning Doctoral internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for beginning Doctoral internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for entry-level competence for beginning Doctoral internship, but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills; not yet competent for entry-level practice and beginning Doctoral internship; remediation required to meet the standard

CLINICAL EXPERIENCE: Note nature of entry

Component	Not Competent Rating: 1	Mostly Competent Rating: 2	Competent Rating: 3	Highly Competent Rating: 4
Evidence of collaboration with key individuals/groups				
Use of scientifically-based, research-based practices				
Appropriate application of DSM criteria for diagnosis				
Appropriate target selection				
Appropriate problem analysis for intervention targets				
Understanding of systems and organizational contexts, including diversity				
Intervention plan detailed, thorough, appropriate and linked to assessment				
Intervention adherence data collected				
Use of systematic problem-solving process				
Data-based decision making application (including decision rules, technically adequate graph if appropriate)				
Case discussion complete, reflecting understanding of best practices				
Overall rating				

Scoring:

Highly Competent (4 Rating): Entry and discussion demonstrate excellent understanding and integration of knowledge and skills; beyond entry-level competence for beginning Doctoral internship

Competent (3 Rating): Entry and discussion demonstrate good understanding and integration of knowledge and skills; entry-level competence for beginning Doctoral internship; minimum score for passing

Mostly Competent/Needs Revision (2 Rating): Entry and discussion overall demonstrate adequate understanding and integration of knowledge and skills for entry-level competence for beginning Doctoral internship, but missing some elements and minor revision is required to meet minimum passing standard

Not Competent (1 Rating): Entry and discussion demonstrate an inadequate level of understanding and integration of knowledge and skills; not yet competent for entry-level practice and beginning Doctoral internship; remediation required to meet the standard
